years of mothering while texts covering the topic of home leaving have tended to privilege the young person's experience. Combining lively empirical material with an illuminating social theoretical framework, Trish Green's book addresses the much neglected area of the mother's experience of separation from her child at the time of their home leaving. The book makes clear how the mother's experience of separation is silenced first by the socio-cultural constructions of motherhood per se, second by the privileging of the child's transition to adulthood and third by a neglect of the relational dimension of this particular life course transition. In doing so, the book makes an important contribution to debates on ageing, identity and the life course and will be of great interest to sociologists with various academic interests.

Handbook of Youth and Young Adulthood Andy Furlong, 2009-06-02 The parameters within which young people live their lives have changed radically. Changes in education and the labour market have led to an increased complexity of the youth phase and to an overall protraction in dependency and transitions. Written by leading academics from several countries, this Handbook introduces up-to-date perspectives on a wide range of issues that affect and shape youth and young adulthood. It provides an authoritative and multi-disciplinary overview of a field of study that offers unique insight on social change in advanced societies and is aimed at academics, students, researchers and policy makers. The Handbook introduces some of the key theoretical perspectives used within youth studies and sets out future research agendas. Each of the ten sections covers an important area of research from education and the labour market to youth cultures, health and crime, whilst discussing change and continuity in the lives of young people. This work introduces readers to some of the most important work in the field while highlighting the underlying perspectives that have been used to understand the complexity of modern youth and young adulthood.

Young People, Place and Identity Peter E. Hopkins, 2013-05-13 *Young People, Place and Identity* offers a series of rich insights into young people's everyday lives. What places do young people engage with on a daily basis? How do they use these places? How do their identities influence these contexts? By working through common-sense understandings of young people's behaviours and the places they occupy, the author seeks to answer these and other questions. In doing so, the book challenges and re-shapes understandings of young people's relationships with different places and identities. The textbook is one of the first books to map out the scales, themes and sites engaged with by young people on a daily basis as they construct their multiple identities. The scales explored here include the body, neighbourhood and community, mobilities and transitions, and urban/rural settings, and how these all shape and are shaped by young people's identities. Each chapter explores how social identities such as race, gender, sexuality, class, disability and religion are constructed within particular contexts and influenced by multiple processes of inclusion and exclusion. These discussions are supported by details of the research methods and ethical issues involved in researching young people's lives. Drawing upon research from a range of contexts including Europe, North America and Australasia, this book demonstrates the complex ways in which young people creatively shape, contest and resist their engagements with different places and identities. The range of issues, topics and case

studies explored include ethical and methodological issues in youth research youth subcultures experiences of home territorialism youth and crime political engagement and participation responses to global issues engagements with different institutional contexts negotiating public space the transition to adulthood drinking cultures The author explores these issues through blending together original empirical research theory and policy Individual chapters are supported by key themes project ideas and suggested further reading Details of key authors journals and research centres and organisations are also included at the end of the book This textbook will be pertinent for undergraduate and postgraduate students and academic researchers interested in better understanding the relationships between young people places and identities
