**CHANGE: MODELS AND PROCESSES** Shawn Cooper, 2012-11-01 This book is intended to assist individuals in dealing with change occurring externally to the person as well as change that the individual attempts to bring about in themselves The approaches taken attempt to organize the concepts of change within a broad framework a continuum or gradient which

will enable the person to see changes in life as existing on a spectrum from those change phenomena which are external to the individual e g economic or environmental events to those within the person e g stopping smoking or changing one s behavior Within an overarching framework of general systems theory which emphasizes a holistic view of change the book describes a number of conceptual structures or what are conceived as models The volume focuses on helping the reader to recognize the way these models appear in the person s environment as well as in the individual s own functioning Further the book indicates how the person can apply these models in his or her own efforts to deal with life and change Thus each chapter describes the essential idea of a particular model and then provides a section on the applications of that model The beginning chapters describe several abstract models followed by a chapter which presents John Bowlby s attachment theory and his concept of internal models which reflect individuals core perceptions of themselves and others finally the book includes a discussion of James Prochaska s stages of change model which describes the ways in which individuals proceed to make changes in their own behavior and functioning The book presents a unified view of change in life as it occurs external to and within the person and concludes with a discussion of ways the individual can consider these various concepts in efforts to make change The book is appropriate for three audiences First the volume is suitable for mental health professionals for whom the book can provide a unique view of the change process in the treatment they offer and they might request that their patients read the book Second the book is relevant for individuals interested in a process of self change whether they are contemplating or are in a psychotherapeutic relationship or simply want to make changes in themselves on their own Third the book is also relevant for managers in organizations who deal with the concepts of change in the individuals they supervise
