From clones, family, abortion, terrorism and the concept of the collective to economics, nuclear power, cap and trade, renewable energy and the politics of climate change, Everest and Bedogne do something much needed and remarkably absent in today's media. They strip away the layers of liberal and conservative ideology to look at the most talked about topics of our time from the standpoint of what the politicians have forgotten: common sense. Brought to light by logic, history and science, the book filters the issues that in today's world every citizen, student and educator needs to understand through what we know to be sound, that which we have gained through our day to day trials, our all too often repressed ability to see things in a practical and matter of fact way.
