Zimbabwe Medium Term Plan, 2011 - 2015, 2011 **Kanyenze: Zimbabwe: The Link Between Politics and**
,2023-03-20 In this accessible and authoritative book Godfrey Kanyenze provides a comprehensive and far reaching analysis of the socio economic development in Zimbabwe in light of the expanding authoritarianism and the ongoing destruction of democratic institutions during the four decades after independence Kanyenze describes the various phases of the socio economic development starting with 1980 when the people of Zimbabwe saw their hard won independence and new democracy as a promise for a *New Public Management in Africa* Benon C. Basheka, Lukamba-Muhiya.
Tshombe, 2017-08-25 The administrative sciences have been dominated by a turn to managerial perspectives in the late 20th and early 21st centuries and in the spirit of this turn New Public Management or NPM promises to produce efficient responsible and client oriented public services The reforms carried out in the pursuit of New Public Management are often accompanied by great optimism and rapid enthusiastic steps toward implementation Even in highly developed industrial countries however these fundamental reforms often overlook the political and cultural contexts of the implementing country *New Public Management in Africa Emerging Issues and Lessons* provides much needed theoretical foundations for NPM reforms in the African context and reflects on the success of existing reforms in the development of several African states The individual contributions in this timely volume provide important analyses of academic discourse practical policy achievements and desiderata The book as a whole however provides a valuable impetus for public administration research in and on African states sharing findings on the results of reforms to date and adjustments required for these reforms to succeed For public administration researchers outside of Africa this book offers a review of New Public Management case studies that are unavailable or difficult to find elsewhere contributing much to the exchange between African and Western administration science research and demonstrating that African administrative research is well prepared to help resolve global challenges *Public Participation in African Constitutionalism* Tania Abbiate, Markus Böckenförde, Veronica Federico, 2017-11-22 During the last decade of the 20th century Africa has been marked by a constitutional wind which has blown across the continent giving impetus to constitutional reforms designed to introduce constitutionalism and good governance One of the main features of these processes has been the promotion of public participation encouraged by both civil society and the international community This book aims to provide a systematic overview of participation forms and mechanisms across Africa and a critical understanding of the impact of public participation in constitution making processes digging beneath the rhetoric of public participation as being at the heart of any successful transition towards democracy and constitutionalism Using case studies from Central African Republic Egypt Kenya Libya Malawi Morocco Senegal Somalia South Africa South Sudan Tanzania Tunisia Zambia and Zimbabwe the book investigates various aspects of participatory constitution making from conception to processes and specific contents that trigger ambivalent dynamics in such processes

The abstract glorification of public participation is questioned as theoretical and empirical perspectives are used to explain what public participation does in concrete terms and to identify what lessons might be drawn from those experiences This is a valuable resource for academics researchers and students with an interest in politics and constitution building in Africa as well as experts working in national offices international organizations or in national and international NGOs

Increasing Resilience and Adaptability to Climate

Change of Vulnerable Groups in Agriculture Seth Etuah, Faizal Adams, Zhen Liu,James Osei Mensah, Jing Lan,2024-12-04 Climate change remains a global challenge due to the livelihood threat it poses particularly to the marginalized or vulnerable groups in society Though developing countries contribute the least to the cause of climate change they remain the most vulnerable to its effects This vulnerability is due to the over reliance of the population on rain fed agriculture as the main livelihood source These mainly smallholder farmers lack institutional technological infrastructural and economic capabilities to adapt to climate change In addition to this there are wide disparities in the allocation of key sustainable livelihood assets e g land livestock farm equipment etc among men women and youth For instance women often have limited access to land financial services social capital technology labour education and other opportunities mainly due to traditional cultural sex divisions within the domestic realm Moreover the majority of the resource poor youth are employed in the agricultural sector rendering them more vulnerable to climate uncertainties The impact of climate change on these groups men women youth and smallholders is expected to be different Studies that fail to acknowledge these differences and focus only on geographical location could be misleading Recent climate change scenarios indicate substantial reductions in the yield of staple foods linked to drought high temperature and rainfall variability with a projected overall decline in revenue from agriculture These projected negative impacts would directly influence food security and render millions of households undernourished According to the Food and Agriculture Organization FAO of the United Nations between 720 and 828 million
