Excerpt from *Practical Zoology* Ideas differ considerably as to what constitutes the best course in zoology for secondary schools but we cannot be far wrong if we succeed in combining a general knowledge of animals and of zoological principles with a discussion of the relations of animals to man in such a way as to interest the students The constant references to the relations of animals to their environment and the selection of common animals especially those of economic importance for illustrative purposes tend to stimulate the natural interest of boys and girls in animal life About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com
