Wood And Wood Joints Building Traditions Of Europe And Japan:

Wood and Wood Joints Klaus Zwerger, 2015 Building with wood as an ecologically viable material is a tradition with a long history In the most typical method elements are connected by using wood joints which do not require the assistance of adhesives or metal connectors By looking at several hundred examples from Japan China and 18 European countries this book describes in great detail the history of timber architecture in terms of its technical aesthetic and ecological dimensions This thorough study is a mine of information to specialists in this field it opens up to the craftsman of today what has become an almost forgotten world and provides a fascinating account for the general reader The new introduction to the third edition reviews developments since the first publication of this book in 1997

Wood and Wood Joints Klaus Zwerger, 1997 In the most typical method of building with wood elements are connected by using wood joints which do not require the assistance of adhesives or metal connectors This art of wood jointing reached its zenith in Japan but Europe too provided its share of highly influential forms By looking at several hundred examples from Japan and 18 European countries this book describes in great detail the history of timber architecture in terms of its technical aesthetic and ecological dimensions The beauty of timber structures and their detailing is captured in superb black and white photographs Exciting three dimensional drawings reveal the secret life concealed within the joints This thorough study will prove a mine of information to specialists in this field it will open up to the craftsman of today what has become an almost forgotten world and provide a fascinating account for the general reader

Wood and Wood Joints Klaus Zwerger, 2023-05-22 There is a long tradition of using wood as a distinct and ecologically sound building material Wooden architecture conveys for today s world the breadth of knowledge held in Western and Eastern cultures about the creative use of this unique material The typical technique of building with wood joinery requires that elements are connected only by the skillful interlocking of the constructive parts In this book the history of wooden architecture is described in detail using hundreds of examples from Japan China and Europe From a holistic understanding a picture emerges that is informative for architects and designers reopens an almost lost world to builders and will enthrall laypeople Also available in a German edition ISBN 978 3 0356 2479 3

Conceptual Joining Lukas Allner, Christoph Kaltenbrunner, Daniela Kröhnert, Philipp Reinsberg, Institute of Architecture at the University of Applied Arts Vienna, Institute of Art Sciences and Art Education at the University of Applied Arts Vienna, 2021-11-22 This book explores experimental approaches to the design and construction of wooden structures in architecture while presenting the results of an artistic research project Through the use of digital tools the anatomy of wood becomes a design determining principle for spatial structures The architects and artists also explore the potential of traditional craftsmanship and derive from this a material oriented practice Structures are not designed here for a specific use but rather open up various usage possibilities due to their unique spatial and geometric properties The documentation provides insight into an open ended research process Guest contributions reflect on the underlying concepts and thus the future relevance of wood as a building

material Digital Wood Design Fabio Bianconi, Marco Filippucci, 2019-02-24 This book explores various digital representation strategies that could change the future of wooden architectures by blending tradition and innovation. Composed of 61 chapters written by 153 authors hailing from 5 continents, 24 countries and 69 research centers, it addresses advanced digital modeling with a particular focus on solutions involving generative models and dynamic value inherent to the relation between knowing how to draw and how to build. Thanks to the potential of computing areas like parametric design and digital manufacturing are opening exciting new avenues for the future of construction. The book's chapters are divided into five sections that connect digital wood design to integrated approaches and generative design to model synthesis and morphological comprehension to lessons learned from nature and material explorations to constructive wisdom and implementation related challenges and to parametric transfigurations and morphological optimizations *Components and Connections* Maarten Meijjs, Ulrich Knaack, 2012-11-05 Every building is composed of parts or components that may be organized in various ways. For example, there are different ways to configure walls so that they perform their primary functions: bearing, dividing and sheltering in an optimal manner. This book presents the most common load-bearing systems such as plate, massive and skeleton construction and describes their impact on the structure as a whole. It explains how spaces can be vertically or horizontally connected and assembled into larger wholes. The individual elements such as floor slabs, roofs, openings and foundations are described together with their functions and the various possibilities for connecting them. The book goes beyond the wealth of possible detail to demonstrate the basic principles of detailing. Numerous specially prepared drawings set forth the principles of components and then illustrate them with reference to realized projects.

Cereal Drying Racks Klaus Zwerger, 2020-09-21 Following his seminal book *Wood and Wood Joints*, an essential reference on solid timber constructions for more than two decades, now in its third edition, Klaus Zwerger presents a study of the cultural history, construction and typology of a special building type: cereal drying racks. These structures were used to dry harvested crops in agrarian cultures all over the world and evolved over the centuries into buildings of great beauty that are as sophisticated and individual as they are functionally efficient. On countless expeditions, the author tracked down the remaining buildings, documenting and analyzing them in the context of their cultural and building history through detailed descriptions, line drawings and photographs rendered in duotone by the author. **Materials, Form and Architecture**
