Friedrich Engels and the Foundations of Socialist Governance Roland Boer, 2021-10-08 This book states that the political systems of China Vietnam Cuba and other socialist countries are showing distinct maturity and ability to deal effectively with challenges the most recent being the COVID 19 pandemic In order to understand how they have developed their structures it is time to return to the roots of the Marxist tradition and re-examine the question of socialist governance It was Friedrich Engels and less so Marx who laid out some of the theoretical foundations for socialist governance On the basis of extensive research in 1870s and 1880s Engels developed his analysis of the nature of hitherto existing states as a separated public power the role of the dictatorship of the proletariat and its exercise of power the actual meaning of the withering away of the state which would be one of the very last outcomes of socialist construction and the nature of socialist governance itself On this matter he proposed a de-politicised public power that would stand in the midst of society and focus on managing the processes of production for the sake of the true interests of society

Lyon,2016-11-17 In late nineteenth century Germany the onset of modernity transformed how people experienced place In response to increased industrialization and urbanization the expansion of international capitalism and the extension of railway and other travel networks the sense of being connected to a specific place gave way to an unsettling sense of displacement *Out of Place* analyzes the works of three major representatives of German Realism Wilhelm Raabe Theodor Fontane and Gottfried Keller within this historical context It situates the perceived loss of place evident in their texts within the contemporary discourse of housing and urban reform but also views such discourse through the lens of twentieth century theories of place Informed by both phenomenological Heidegger and Casey as well as Marxist Deleuze Guattari and Benjamin approaches to place John B Lyon highlights the struggle to address issues of place and space that reappear today in debates about environmentalism transnationalism globalization and regionalism Structure, Agency and Theory Ib Gram-Jensen,2021-04-20 Structure Agency and Theory challenges common readings of Marx and Engels historical materialism and argues the necessity of abandoning their conception of the dialectic of forces and relations of production as the motive power of historical development and transformations because of its doubtful validity and deterministic implications Instead another fundamental conception in historical materialism the interaction between social circumstances and agency as the motive power of history is accentuated with an emphasis on agents experiences as a causal factor arguing its potential in terms of historical explanation and attempting to spell out some of its strategic implications for revolutionary socialism **European Cities in the Modern Era, 1850-1914** Friedrich Lenger,2012-08-17 In *European Cities in the Modern Era 1850-1914* Friedrich Lenger offers an account of Europe s major cities in a period crucial for the development of much of their present shape and infrastructure From Marx to Hegel and Back Victoria

Fareld,Hannes Kuch,2020-01-09 The relation between Hegel and Marx is among the most interpreted in the history of philosophy Given the contemporary renaissance of Marx and Marxist theories how should we re read the Hegel Marx connection today What place does Hegel have in contemporary critical thinking Most schools of Marxism regard Marx s inversion of Hegel s dialectics as a progressive development leaving behind Hegel s idealism by transforming it into a materialist critique of political economy Other Marxist approaches argue that the mature Marx completely broke with Hegel By contrast this book offers a wide ranging and innovative understanding of Hegel as an empirically informed theorist of the social political and economic world It proposes a movement from Marx to Hegel and back by exploring the intersections where the two thinkers can be read as mutually complementing or even reinforcing one another With a particular focus on essential concepts like recognition love revolution freedom and the idea of critique this new intervention into Hegelian and Marxian philosophy unifies the ethical content of Hegel s philosophy with the power of Marx s social and economic critique of the contemporary world
