Individuals in working class tend to have low level of education and there can be numerous reasons to why individuals have low education and not being able to pursue higher level of education but one being is the fact working class people find it harder to afford equipment for school and being able to afford books to better their education there for it makes it difficult for them to participate in social mobility (idea of moving from classes) a reason being is because of restrictions not allowing them . people in working have no choice but to remain in their social position because their inability to move up there for they must remain in their jobs however it can be argued that working class can achieve social mobility for example looking at Richard Branson he was from a working-class background but was able to move to the upper class however the likelihood of working class partaking in social mobility is very unlikely, but it can be achieved.
