Research Methods for International Human Rights Law Damian Gonzalez-Salzberg, Loveday Hodson, 2019-06-13 The study and teaching of international human rights law is dominated by the doctrinal method A wealth of alternative approaches exists but they tend to be discussed in isolation from one another This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field As such it provides a coherent accessible and diverse account of key theories and methods A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method Furthermore since every contribution follows the same uniform structure this allows for fruitful comparison between different approaches to the study

Handbook of Qualitative Research Methods in Entrepreneurship

Helle Neergaard, John P. Ulhøi, 2007 the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon Craig S Galbraith Journal of Enterprising Communities There is no hiding behind the ramparts of dry scholarship here The credibility of the theory being spoken of is not the stuff of constructed proofs but alignments of critical insight and utility This is where qualitative work can make a difference to the field and where this book makes its mark Robin Holt International Journal of Entrepreneurial Behaviour and Research The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done are doing and will do in entrepreneurship research Every serious entrepreneurship scholar should read it It points at the future Bjørn Bjerke University of Kalmar Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies For those who try to get away from only quantitative studies in both business practice and academic research this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic discourse and narrative approaches It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions This domain is not physics In bringing together such a variety of experts from so many nationalities in this Handbook our Danish colleagues are making entrepreneurship research a realistic global venture Jan Ulijn Eindhoven University of Technology The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches This book is not simply a handbook of qualitative research methods though it well achieves this aim it is also an important contribution

towards the field of entrepreneurship research From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship It fills a crucial gap in the literature on entrepreneurship theory and just as importantly illustrates how these principles and techniques can be appropriately and fruitfully employed The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies They achieve this by providing concrete examples of research experiences and tangible how to advice By clarifying what these research methods entail how they are currently being used and how they can be evaluated this Handbook constitutes a comprehensive and highly accessible methodological toolbox Dealing with both well accepted qualitative approaches and lesser known rarer and more novel approaches to the study of entrepreneurship this Handbook will be invaluable to those studying researching and teaching entrepreneurship

socio legal perspective The objective of the collection is to show how different methods can be used in researching law and legal phenomena how methodological issues and debates in sociology are relevant to the study of law and the importance of the debate between structural and action traditions in researching law It also approaches the methodological problem of how sociology of law can address the content of legal practice from a variety of perspectives and discusses the relationship between pure and applied research The editors provide a critical introduction to each of the six sections and a general introduction on law sociology and method The collection will provide an invaluable resource for socio legal researchers law school researchers and postgraduates
