Utility and Rights Raymond Gillespie Frey, 1984 *Utility and Rights* was first published in 1984 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions At issue in the clash between utilitarianism and the theory of rights is a fundamental question about the theoretical underpinnings of moral and political philosophy Is this structure to be utility based grounded in the general welfare or is it to be based on individual moral and political rights as critics of utilitarianism increasingly insist The argument centers in part upon the fact that utilitarianism with its emphasis upon outcomes and total utility in the world seems to employ a value theory that offers no protection to persons and their vital interests The essays in this volume grapple with the main issues in this controversy They share a common concern with the nature of rights and the ways in which various moral theories can accommodate them some measure the degree to which utilitarianism can or cannot be modified to include rights Eight of the eleven essays were written expressly for this book all of the authors are deeply engaged in the debate over utility and rights and their essays build upon and extend current thinking on the subject R G Frey's lucid introduction will make the book appropriate for advanced students as well as for scholars in moral political and legal theory One ubiquitous criticism of utilitarianism is that it cannot make sense of moral rights at all This collection is the first that explicitly addresses these issues and it marks a major step in the debate Dale Jamieson University of Colorado R G Frey is senior lecturer in philosophy at the University of Liverpool He is the author of *Interests and Rights* and *Rights Killing and Suffering*

A Utilitarian General Theory of Value C.L. Sheng, 2022-07-18 The thesis of this book is to develop a theory of value covering all kinds of values based on my unified utilitarian theory It is unique and is different from all traditional and

existing theories of value Like the views of most psychologists and decision scientists value is asserted to be subjective in nature because value exists only for a subject Value and value judgment are considered statistical in nature in three dimensions namely in the dimensions of subject object and judge This theory covers a modified von Neumann Morgenstern utility theory as an integral part The three conceptions of utility held by philosophers economicists and decision scientists are unified The traditional and conventional classification of value into intrinsic and instrumental which may lead to confusion misunderstanding and circularity is not used Instead a classification based on the classification of good things in life according to the principle of exchangeability and replaceability is emphasized and used A decision theoretic approach is taken for the study of actions in life All the actions in a person's life are for the pursuit of values and all the values pursued are related directly or indirectly closely or remotely to a life plan Thus this utilitarian general theory of value eventually leads to a philosophy of life which is also consequential teleological and utilitarian
