Cronin, 2022-11-30 Philosophy has sometimes been described as the discipline in which you can never be wrong as the reserve of absentminded professors aloof academics and purveyors of obscure ideas or interesting opinions Quite the contrary Philosophy answers the hard questions Does everything happen by chance Is there anything more than matter in the universe Are humans in the same class as animals Is there a God Can we know the correct answer to these questions The answers to these questions matter We are all philosophers even though we are not aware of the fact We each have a set of ultimate priorities and principles answers to these questions a big picture that determines our everyday thoughts decisions and actions In this book Brian Cronin uses the ideas of Bernard Lonergan's *Insight A Study of Human Understanding* to argue methodically towards a correct critical comprehensive worldview an answer to those big questions which is the precise task of first philosophy This book is an accessible and readable presentation of Lonergan's metaphysics a somewhat

neglected topic Science and philosophy are complementary Scientists answer the concrete detailed questions about everything around us the parts Philosophy integrates all these into a correct worldview of the whole of everything
