Plants and People in the African Past Anna Maria Mercuri, A. Catherine D'Andrea, Rita Fornaciari, Alexa Höhn, 2018-07-31 There is an essential connection between humans and plants cultures and environments and this is especially evident looking at the long history of the African continent This book comprising current research in archaeobotany on Africa elucidates human adaptation and innovation with respect to the exploitation of plant resources In the long term perspective climatic changes of the environment as well as human impact have posed constant challenges to the interaction between peoples and the plants growing in different countries and latitudes This book provides an insight into overview of the manifold routes people have taken in various parts Africa in order to make a decent living from the provisions of their environment by bringing together the analyses of macroscopic and microscopic plant remains with ethnographic

botanical geographical and linguistic research The numerous chapters cover almost all the continent countries and were prepared by most of the scholars who study African archaeobotany i e the complex and composite history of plant uses and environmental transformations during the Holocene

3500 Plant Species of the Botanic Gardens of Indonesia

,2013-07-18 After approximately 2 years of sheer hard work involving over 120 people we finally managed to complete our monumental task to publish the 1 216 pages book displaying identifying and describing over 3 500 plant species with beautiful and informative photography illustrations This is the first book of its kind in Indonesia and perhaps in the world The 3 500 Plant Species of the Botanic Gardens of Indonesia is the true smart book of the plant world for everybody scientists researchers teachers students hobbyists and just about anybody who loves plants and gardening Designed to be easy to use and carry the book offers complete information on more than 3 500 plant species from the collection of the four botanic gardens of Indonesia Bogor Botanic Gardens Cibodas Botanic Gardens both located in West Java Purwodadi Botanic Gardens East Java and Eka Karya Bali Botanic Gardens These botanic gardens were initially created to accommodate introduced plants that have a commercial potential to Indonesia Bogor Botanic Gardens built on 18 May 1817 is for wet lowland species Cibodas Botanic Gardens built on 1 April 1852 for wet highland species Purwodadi Botanic Gardens built on 30 January 1941 for dry lowland species and Eka Karya Bali Botanic Gardens built on 15 July 1959 for dry highland species From the beginning native plants are also planted and continuously added with new plant species collected during the expeditions to the many islands in the Indonesian archipelago The presentation of the plants are divided into sections based on their habitus and genus presented in an alphabetical order so that you can search for the plants that you are looking for in an easy and methodical way The plant species are divided into 11 sections starting from Tree Shrub Palm Cycad Bamboo Fern Climber Succulent Herb Aquatic and Orchid So if you are looking for a particular tree go to the Tree section and search for the Latin name first Apart from the basic data of the species you will also be able to find the English and Indonesian name of the plant If you are searching for plants that you see in your garden or herbarium look under Shrub or Herb sections A complete Glossary and detailed illustrations of the plant anatomy helps you quickly learn and understand the technical terms used by botanists in describing plant species The book is beautifully illustrated with excellent photographs showing the full view and details of leaves flowers fruit trunks and some the unique features of the plants now you can make a positive identification of the plant species quickly and confidently The book also features a special photography contribution from Mme Ani Yudhoyono who is a concerned environmentalist nature lover and avid photographer who has already published a very special book entitled The Colors of Harmony A Photography Journey by Ani Yudhoyono Economic Botany G.E. Wickens,2012-12-06 The strength of this book is that it is written by someone who has spent a lifetime devoted to the science of economic botany The author has brought together his vast experience in the field in Africa with his studies of arid land plants at the Royal Botanic Gardens Kew The result is an informative and reliable text that covers a vast range of topics It is

also firmly based upon the author's research and interest in plant taxonomy and therefore fully acknowledges the importance of correct naming and classification in the field of science of economic botany. The coverage is of economic botany in its broadest sense. I was delighted to find such topics as ecophysiology, plant breeding, the environment and conservation are included in the text. This gives the book a much more comprehensive coverage than most other texts on the subject. I was also glad to see that the book covers the use of various organisms that are no longer considered part of the plant kingdom such as various species of fungi and algae. It is indeed a broad-ranging book that will be of use to many people interested in the uses of plants and fungi. Economic botany is once again being given more prominence as a discipline because of its enormous relevance to both conservation and sustainable development. Those people involved in those topics should find this a most useful resource.

Medicinal Spices and Herbs from India Sankhadip Bose, Sutapa Biswas Majee, Sabyasachi Banerjee, 2024-12-13 Indian spices are known for their tremendous advantages both as medicines as well as in cuisine. This two-volume book provides valuable and detailed information about the pharmacological and therapeutic benefits of traditional and exotic Indian spices grown on Indian soil and available across geographical boundaries. Volume 2 focuses on individual spices and their uses in treating various diseases. In particular, the volume explores the impacts and uses of black cumin, celery, black stone, flowers, chili pepper, Asian spider flower, alkanet, kapok tree, pomegranate, asafoetida, fenugreek, cardamom, Indian sandalwood, musk, and more. Exploring each herb in detail, the book provides both new information as well as reinforces existing knowledge regarding these spices, adding to the knowledge about these exotic Indian spices in the field of medicine. Volume 1: Introduction, Therapeutic Properties and Commercial Products provides an introduction to the history of use of spices in Indian culture and goes on to discuss the influence of geographical location and climatic variation, processing conditions for extraction of active principles, medicinal uses of traditional spices, the therapeutic properties and molecular mechanisms of exotic Indian spices used as medicine in the treatment of cancer, inflammation, diabetes, metabolic syndrome, brain and cognitive function, cardiovascular diseases, skin diseases, gastrointestinal disorders, bacterial infections, and other pathological conditions.

Guide to Sources for Agricultural and Biological Research J. Richard Blanchard, Lois Farrell, 2023-07-28

Oursi Hu-beero Lucas Pieter Petit, Maya von Czerniewicz, Christoph Pelzer, 2011 This final report describes the study of an exceptionally well preserved

Iron Age building discovered in northern Burkina Faso West Africa The site of Oursi hu beero meaning the big house of Oursi in the locally spoken Songhay language was excavated in 2000 and 2001 by a scientific team from the universities of Frankfurt am Main and Ouagadougou It is situated in the middle of a group of settlement mounds nearby the modern village of Oursi In the year 2000 deep erosion gullies were threatening the architectural remains on the surface which were provisionally dated to the 10th century AD Scholars from both universities saw the importance of this site and undertook immediate action But even they were not prepared for what they uncovered under only one metre of destruction debris The rich diversity of incredible finds in the 25 different rooms rendered their exposure of enormous importance for the archaeology and history of Burkina Faso Complete storage jars metal equipment wooden furniture rope and textile fragments grinding stones and charred botanical remains are only a fraction of the total assemblage of finds Although we are dealing with the results of a single occupation phase and from one building only the density of finds the preservation of the architecture and the absence of later disturbances add considerably to our understanding of daily life in this part of West Africa Up to now the limited contextual information about life in villages and towns prior to the historical periods has promoted divergent and weakly argued interpretations This volume breaks open new grounds of investigation and calls for further study Additionally the editors hope that this report will stimulate and encourage the discussion between historians and archaeologists of the fascinating West African past The current volume presents an introduction to the expedition an analysis of the site formation processes the presentation of the architectural features in depth studies of the findings and a lively account of the heritage management project that resulted in an on site museum Nine authors contributed to this rich and multifaceted final report The account of the construction intensive use violent destruction and subsequent rediscovery of the building is the enthralling subject of this volume which is richly illustrated with numerous coloured drawings photographs maps and reconstruction drawings It melds archaeological historical and environmental data into a thrilling story A story that reads like a new Crime Scene Investigation episode but happens to have been a real life tragedy in the African Sahel almost 1 000 years ago

Medicinal plants 2 Schmelzer, G.H. & Gurib-Fakim, A.,2008 PROTA 11 deals with the medicinal plants of Tropical Africa Because the group is very large it has been subdivided into 4 volumes This volume PROTA 11 2 describes 409 medicinal plants in 146 review articles All articles are illustrated with geographic distribution maps and many with botanical line drawings

Pesticidal Plants Philip C. Stevenson,Steven R. Belmain,Murray B. Isman,2020-05-27 The global biodiversity and climate emergencies demand transformative changes to human activities For example food production relies on synthetic industrial and non sustainable products for managing pests weeds and diseases of crops Sustainable farming requires approaches to managing these agricultural constraints that are more environmentally benign and work with rather than against nature Increasing pressure on synthetic products has reinvigorated efforts to identify alternative pest management options including plant based solutions that are environmentally benign and can be

tailored to different farmers needs from commercial to small holder and subsistence farming Botanical insecticides and pesticidal plants can offer a novel effective and more sustainable alternative to synthetic products for controlling pests diseases and weeds This Special Issue reviews and reports the latest developments in plant based pesticides from identification of bioactive plant chemicals mechanisms of activity and validation of their use in horticulture and disease vector control Other work reports applications in rice weeds combination biopesticides and how chemistry varies spatially and influences the effectiveness of botanicals in different locations Three reviews assess wider questions around the potential of plant based pest management to address the global challenges of new invasive and established crop pests and as yet underexploited pesticidal plants
