Web Archives and Web Archiving Asger Harlung, 2025-04-23. Web archives are repositories of content preserved from the World Wide Web, not to be confused with other types of archives that offer services or content online. Web archives preserve content that otherwise tends to disappear or change rapidly, which probably makes them the most important initiative towards preservation of cultural heritage in our age. Never before have the actions, ongoing sentiments, trends, decision processes in politics, business, and industry, institutions, news media, entertainment providers, interest groups, and individuals been documented or preserved at the level of detail offered by ongoing and systematic preservation of the Web, with content from all levels of society. This book strives to present the underlying methods and reasons for preserving web content, with a focus on the principles rather than specific methods that may become obsolete almost as quickly as web pages may disappear, and on detailing the nature of the archived results with its potentials and pitfalls.
