Utrecht En De Cholera 18321910:

An Economic and Social History of the Netherlands, 1800-1920 Michael Wintle, 2000-09-21 An Economic and Social History of the Netherlands 1800 1920 provides a comprehensive account of Dutch history from the late eighteenth to the early twentieth century examining population and health the economy and socio political history The Dutch experience in this period is fascinating and instructive the country saw extremely rapid population growth awesome death rates staggering fertility some of the fastest economic growth in the world a uniquely large and efficient service sector a vast and profitable overseas empire characteristic pillarization and relative tolerance Michael Wintle also examines the lives of ordinary people what they ate how much they earned what they thought about public affairs and how they wooed and wed This book will be of central importance to Dutch specialists as well as European historians more generally Health Care and Poor Relief in 18th and 19th Century Northern Europe Ole Peter Grell, Andrew Cunningham, 2017-07-05 Throughout history governments have had to confront the problem of how to deal with the poorer parts of their population During the medieval and early modern period this responsibility was largely borne by religious institutions civic institutions and individual charity By the eighteenth century however the rapid social and economic changes brought about by industrialisation put these systems under intolerable strain forcing radical new solutions to be sought to address both old and new problems of health care and poor relief This volume looks at how northern European governments of the eighteenth and nineteenth centuries coped with the needs of the poor whilst balancing any new measures against the perceived negative effects of relief upon the moral wellbeing of the poor and issues of social stability Taken together the essays in this volume chart the varying responses of states social classes and political theorists towards the great social and economic issue of the age industrialisation Its demands and effects undermined the capacity of the old poor relief arrangements to look after those people that the fits and starts of the industrialisation cycle itself turned into paupers The result was a response that replaced the traditional principle of outdoor relief with a generally repressive system of indoor relief that lasted until the rise of organised labour forced a more benign approach to the problems of poverty Although complete in itself this volume also forms the third of a four volume survey of health care and poor relief provision between 1500 and 1900 edited by Ole Peter Grell and Andrew Cunningham Women, Gender and Labour Migration Pamela Sharpe, 2002-01-31 Approximately half of all migrants are today are female The contributors to this volume consider the ways in which attention to gender is moving debates away from old theories that have long dominated the field of migration studies *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1993 **Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 **The House of Orange in Revolution and War** Jeroen Koch, Dik van der Meulen, Jeroen van Zanten, 2022-06-06 An epic account of the House of Orange Nassau over one hundred and fifty years of European history Three rulers from the House of Orange Nassau reigned over the Netherlands from 1813 to 1890 King

William I from 1813 to 1840 King William II from 1840 to 1849 and King William III from 1849 to 1890 Theirs is an epic tale of joy and tragedy progress and catastrophe disappointment and glory all set against the backdrop of a Europe plagued by war and revolution The House of Orange in Revolution and War relates one and a half centuries of House of Orange history in a gripping narrative leading the reader from the last stadholders of the Dutch Republic to the modern monarchy of the early twentieth century from the French Revolution and the Napoleonic wars to World War I and the European Revolutions that came after it

Politics of Urban Knowledge Bert De Munck, Jens Lachmund, 2023-03-23 This book uses politics of urban knowledge as a lens to understand how professionals administrations scholars and social movements have surveyed evaluated and theorized the city identified problems and shaped and legitimized practical interventions in planning and administration Urbanization has been accompanied and partly shaped by the formation of the city as a distinct domain of knowledge This volume uses politics of urban knowledge as a lens to develop a new perspective on urban history and urban planning history Through case studies of mainly 19th and 20th century examples the book demonstrates that urban knowledge is not simply a neutral means to represent cities as pre existing entities but rather the outcome of historically contingent processes and practices of urban actors addressing urban issues and the power relations in which they are embedded It shows how urban knowledge making has reshaped the categories rationales and techniques through which urban spaces were produced governed and contested and how the knowledge concerned became performative of newly emerging urban orders The volume will be of interest to scholars and students in the field of urban history and urban studies as well as the history of technology science and knowledge and of science studies

Vanhaute, 2007 The decade that gave rise to the term the Hungry Forties in Europe is often regarded and rightly so as one of deprivation unrest and revolution Two events the Great Irish Famine and the various political events of 1848 stand out This book is the first to discuss the subsistence crisis of the 1840s in a truly comparative way This subsistence crisis may be divided into two rather distinct elements On the one hand the failure of the potato caused by the new unfamiliar fungus *phytophthora infestans* which first struck Europe in mid 1845 resulted in a catastrophe in Ireland that killed about one million people and radically transformed its landscape and economy Poor potato crops in 1845 and in the following years also resulted in significant excess mortality elsewhere in Europe On the other hand this period and

1846 in particular was also one of poor wheat and rye harvests throughout much of Europe. Failure of the grain harvest alone rarely resulted in a subsistence crisis but the combination of poor potato and grain harvests in a single place was a lethal one. Connections between the local and the global, between the economic and the political and between the rural and the industrial make the crisis of the late 1840s a multi-layered one. This book offers a comparative perspective on the causes and the effects of what is sometimes considered as the last European subsistence crisis. It begins with an extensive introduction that treats the topic in comparative perspective. The subsistence crisis had its most catastrophic impact in Ireland and three chapters in the current volume are concerned mainly with that country. A fourth chapter uses price data to shed comparative perspective on the crisis while the remaining nine chapters are case studies covering countries ranging from Sweden to Spain and from Scotland to Prussia. Throughout the contributors focus on a range of common themes such as the extent of harvest deficits, the functioning of food markets, fertility and mortality and public action at local and national levels.

Kuyper in de kiem

J. Vree, 2006

In deze bundel wordt het leven en werk van Abraham Kuyper in de jaren 1848-1874 beschreven. Het complete gedachtengoed van deze tijdgenoot van Allard Pierson. Busken Hueter en Multatuli was toen al in de kiem aanwezig. In 1860 ontwierp Kuyper een kerkmodel waarin niet het instituut centraal staat maar het organisme van door de Geest geleide gelovigen. Kuypers ideale kerk is sociaal democratisch en financieel onafhankelijk van

de staat Vrouwelijke lidmaten hebben zowel actief als passief kiesrecht Naarmate deze kerk beter functioneert in de samenleving kan de rol van de staat als behoeder van de humaniteit minder worden Na zijn wending tot de orthodoxie bemoeide Kuyper die aanvankelijk alleen bekend was vanwege zijn internationaal erkende kerkhistorisch pionierswerk zich als predikant steeds meer met de gang van zaken in de Nederlandse Hervormde Kerk de beginnende schoolstrijd de journalistiek en de politiek In 1873 ontdekte hij het internationale Calvinisme als bron van inspiratie Het jaar daarop werd hij lid van de Tweede Kamer *Het arme roomse leven* A.
