Turtles Termites And Traffic Jams Explorations In Massively Parallel Microworlds:

Turtles, Termites, and Traffic Jams Mitchel Resnick, 1997-01-22 How does a bird flock keep its movements so graceful and synchronized Most people assume that the bird in front leads and the others follow In fact bird flocks don't have leaders they are organized without an organizer coordinated without a coordinator And a surprising number of other systems from termite colonies to traffic jams to economic systems work the same decentralized way Turtles Termites and Traffic Jams describes innovative new computational tools that can help people even young children explore the workings of such systems and help them move beyond the centralized mindset *Turtles, Termites, and Traffic Jams* Resnick, 2005

Turtles, Termites, and Traffic Jams Mitchel Resnick, 1994 *Complex Decision Making* Hassan Qudrat-Ullah, J. Michael Spector, Paal Davidssen, 2007-09-22 Today's ever more complex world creates challenges for decision makers This volume reviews the principles underlying complex decision making the handling of uncertainties in dynamic environments and the various modeling approaches Beginning with a discussion of the underlying concepts theories and empirical evidence the book gives you a range of practical tools and techniques for decision making in complex environments and systems

Artificial Intelligence Research and Development Sandra Sandri, Miquel Sànchez-Marrè, Ulises Cortés, 2009 This book is a collection of 45 accepted papers originally submitted for the 12th International Conference of the Catalan Association for Artificial Intelligence ACIA It also includes a brief summary of two papers from invited speakers The Catalan Association for Artificial Intelligence was founded in 1994 with the aim of fostering cooperation among researchers from the Catalan speaking AI research community Collaboration between ACIA members and the wider international AI community has also been well established now for many years The papers in these proceedings reflect this collaboration and include contributions not only from the Catalan speaking regions of Spain but also from France and Italy and from as far afield as Mexico and Australia Of all the fields in computer science AI is the one most intertwined with all sorts of disciplines dealt with in the human experience often employing lessons learnt in one discipline to implement a task in another The papers in this volume reflect the rich diversity in AI covering areas such as logics natural language machine learning computer vision robotics and multi agent systems *The Berkana Community of Conversations* Marilyn Hamilton, 2006-05-26 This research used the

online experiment the Berkana Community of Conversations BCC as a case study to explore learning and leadership in a self organizing online microworld an internet small world with rules of engagement simulating complex adaptive organizations Based on theories of learning Papert 1996 biology of consciousness Maturana and Varela 1992 and integral models Wilber 1996 an integral methodological design analyzed languaging and relationships as key data sources Leadership was mapped as a continuum of behaviors that created effective processes for meaning making action direction and accomplishment Meaning making was tracked in four directions three types of connections exploratory transformative and linking and six plus levels Self organizing leaders 1 initiated patterns 2 developed patterns and 3 created connections The same mapping

revealed the ontogeny of community learning within organization s System wide order emerged through learning tracked on four quadrant developmental scales intentional behavioral cultural and social Wilber 1996 The microworld demonstrated connections create meanings patterns create relationships create identity As a self organizing microworld BCC survived seven months structurally coupled with its environment and replicated itself within and outside experiment boundaries Such a microworld can realistically replicate action based learning situations where leaders learn new ways of leading and organizing

Stigmergic Optimization Ajith Abraham,Crina Grosan,Vitorino Ramos,2006-10-06 Biologists studied the behavior of social insects for a long time After millions of years of evolution all these species have developed incredible solutions for a wide range of problems The intelligent solutions to problems naturally emerge from the self organization and indirect communication of these individuals Indirect interactions occur between two individuals when one of them modifies the environment and the other responds to the new environment at a later time Such an interaction is an example of stigmergy This book deals with the application of stigmergy for a variety of optimization problems This volume comprises 12 chapters including an introductory chapter giving the fundamental definitions inspirations and some research challenges Important features include a detailed overview of all the stigmergic optimization paradigms excellent coverage of timely advanced stigmergic optimization topics state of the art theoretical research and application developments and chapters authored by pioneers in the field Academics scientists as well as engineers engaged in research development and application of stigmergic optimization will find the comprehensive coverage of this book invaluable

Advances in Artificial Life Mathieu Capcarrere, Alex A. Freitas, Peter J. Bentley, Colin G. Johnson, Jon Timmis, 2005-08-29 The Artificial Life term appeared more than 20 years ago in a small corner of New Mexico USA Since then the area has developed dramatically many researchers joining enthusiastically and research groups sprouting everywhere This frenetic activity led to the emergence of several strands that are now established fields in themselves We are now reaching a stage that one may describe as maturer with more rigour more benchmarks more results more stringent acceptance criteria more applications in brief more sound science This which is the natural path of all new areas comes at a price however A certain enthusiasm a certain adventurousness from the early years is fading and may have been lost on the way The field has become more reasonable To counterbalance this and to encourage lively discussions a conceptual track where papers were judged on criteria like importance and or novelty of the concepts proposed rather than the experimental theoretical results has been introduced this year A conference on a theme as broad as Artificial Life is bound to be very diverse but a few tendencies emerged First fields like Robotics and Autonomous Agents or Evolutionary Computation are still extremely active and keep on bringing a wealth of results to the Artificial Life community Even there however new tendencies appear like collective robotics and more specially self assembling robotics which represent now a large subsection Second new areas appear
