between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War

The Oxford Handbook of Approaches to Language Evolution Limor Raviv, Cedric Boeckx, 2025-04-11. This handbook provides a detailed account of the many methodological tools and approaches used in the field of language evolution. The field has seen a rapid growth over the last decade with a greater focus on empirical data and interdisciplinary syntheses. This volume aims to make sense of these recent developments to provide a clear map of the current research landscape and to showcase some of the most important advances. Each chapter highlights a particular methodology and outlines a question or set of questions that can be addressed using that methodology, illustrated by a key example from the recent literature. The volume is divided into three parts: Part I showcases the many ways in which humans can shed light on the evolution of language when placed in specific experimental settings, as well as discussing the use of clinical, genetic, observational, and historical data; Part II is devoted to simulations and models that enable the careful control of biases, mechanisms, and environments; while Part III revolves around the idea that the study of non-human animals can provide valuable insights into the evolution of human language. The handbook as a whole demonstrates that multiple complementary approaches are necessary to do justice to the complexity of language evolution.
