Twelve Views From The Distance:

Twelve Views from the Distance Mutsuo Takahashi, 2012 From one of the foremost poets in contemporary Japan comes this entrancing memoir that traces a boy's childhood and its intersection with the rise of the Japanese empire and World War II Originally published in 1970 this translation is the first available in English In twelve chapters that visit and revisit critical points in his boyhood Twelve Views from the Distance presents a vanished time and place through the eyes of an accomplished poet Recounting memories from his youth Mutsuo Takahashi captures the full range of his internal life as a boy shifting between his experiences and descriptions of childhood friendships games songs and school With great candor he also discusses the budding awareness of his sexual preference for men providing a rich exploration of one man's early queer life in a place where modern Western influenced models of gay identity were still unknown Growing up poor in rural southwestern Japan far from the urban life that many of his contemporaries have written about Takahashi experienced a reality rarely portrayed in literature In addition to his personal remembrances the book paints a vivid portrait of rural Japan full of oral tradition superstition and remnants of customs that have quickly disappeared in postwar Japan With profuse local color and detail he re-creates the lost world that was the setting for his beginnings as a gay man and poet The Practice of Perspective: Or, an Easy Method of Representing Natural Objects According to the Rules of Art ... Written in French by a Jesuit of Paris [i.e. Jean Dubreuil] ... Translated Into ... English ... by E. Chambers. [With Illustrations.], 1726 **Perspective practical. Or, a plain ... method of ... representing all things to the eye at a distance, by the exact rules of art ... Very useful ... for all Painters ... By a Religious Person of the Society of Jesus, a Parisien [J. Dubreuil]. Faithfully translated out of French, and illustrated with 150 copper cuts. Set forth in English by R. Bokser, 1975 *Masters of All They Surveyed* D. Graham Burnett, 2000 Chronicling the British pursuit of the legendary El Dorado *Masters of All They Surveyed* tells the fascinating story of geography cartography and scientific exploration in Britain's unique South American colony Guyana How did nineteenth century Europeans turn areas they called terra incognita into bounded colonial territories How did a tender footed gentleman predisposed to seasickness and unable to swim make his way up churning rivers into thick jungle arid savanna and forbidding mountain ranges survive for the better part of a decade and emerge with a map What did that map mean In answering these questions D Graham Burnett brings to light the work of several such explorers particularly Sir Robert H Schomburgk the man who claimed to be the first to reach the site of Raleigh's El Dorado Commissioned by the Royal Geographical Society and later by the British Crown Schomburgk explored and mapped regions in modern Brazil Venezuela and Guyana always in close contact with Amerindian communities

Drawing heavily on the maps reports and letters that Schomburgk sent back to England and especially on the luxuriant images of survey landmarks in his Twelve Views in the Interior of Guiana reproduced in color in this book Burnett shows how a vast network of traverse surveys illustrations and travel narratives not only laid out the official boundaries of British Guiana but also marked out a symbolic landscape that fired the British imperial imagination Engagingly written and beautifully illustrated Masters of All They Surveyed will interest anyone who wants to understand the histories of colonialism and science **British Journal Photographic Annual** ,1891 Mechanical Drawing ...
