Twistz Bandz Patterns:

Pattern Formation in Liquid Crystals Agnes Buka, Lorenz Kramer, 2012-12-06 In the last 20 years the study of nonlinear nonequilibrium phenomena in spatially extended systems with particular emphasis on pattern forming phenomena has been one of the very active areas in physics exhibiting interesting ramifications into other sciences During this time the study of the classic systems like Rayleigh Benard convection and Taylor vortex flow in simple fluids has also been supplemented by the study of more complex systems Here liquid crystals have played and are still playing a major role One might say that liquid crystals provide just the right amount and right kind of complexity They are full of nonlinearities and give rise to new symmetry classes which are sometimes actually simpler to deal with qualitatively but they still allow a quantitative description of experiments in many cases In fact one of the attractions of the field is the close contact between experimentalists and theorists Hydrodynamic instabilities in liquid crystals had already experienced a period of intense study in the late 1960s and early 1970s but at that time neither the experimental and theoretical tools nor the concepts had been developed sufficiently far to address the questions that have since been found to be of particular interest The renewed interest is also evidenced by the fact that a new series of workshops has evolved The first one took place in 1989 in Bayreuth and united participants from almost all groups working in pattern formation in liquid crystals

tablet woven bands from Egypt Silvia Ungerechts, 2024-03-05 This volume is about tablet woven bands from Egypt mainly dating to the early Byzantine era better known as Coptic era around 395-642 AD It covers 62 Coptic bands tracked down from museums all over the world including New Zealand It features detailed photographs of the original bands as well as their reconstructions The book honors the craft of the Egyptian tablet weavers by examining these fascinating bands attempting to come as close as possible to the original finds with the versions the author wove and documented in the pattern drafts The focus is on making these beautiful often very brightly colored bands accessible to today's tablet weaving community hopefully inspiring contemporary weavers to reweave these treasures from the past thus bringing them back to life
