Fleet Tactics and Coastal Combat Wayne Hughes, 2014-08-01

This major revision updates Wayne Hughes's 1986 landmark study that is credited with providing decision makers a sound foundation for battle planning and tactical thinking. The book integrates the historical evolution of tactics analysis and fleet operations and today it can serve as a primer for anyone who wants to learn how navies fight and win. This second edition includes much new material on combat in the missile age and reflects the reconfiguration of many tactics for littoral operations after the fall of the Soviet Union. Hughes recreates famous battles to show how tactics have changed through the ages and the ways in which they have remained unchanged. He covers tactical interaction between land and sea, the sensory revolution of WWII, secret weapons and maritime surprise, the role in battle of leadership and morale, and the importance of surface warships in today's U.S. fleet. He suggests that naval tactics, unlike ground combat, are dominated by the offense and concludes that the great tactical maxim must be: attack effectively first. A new chapter traces the evolution of missile tactics at sea and includes details of attacks on ships. Many changes emphasize joint operations and coastal combat. The already extensive appraisal of command and control and information warfare is further expanded to cover modern naval operations and the character of modern salvo warfare. In the tradition of Mahan and Clausewitz, this classic text incorporates literature, politics, and a knowledge of human nature. Indispensable reading for all those interested in naval tactics, it is also a valuable reference for wargamers.

Naval Advising and Assistance

Donald Stoker, Michael T. McMaster, 2017-10-20. This original edited volume is the only book on naval advising. Drawing upon the work of scholars and practitioners from all over the world, it takes a comparative and global approach to examining the history, theory, and evolution of naval advising and assistance. Starting with a brief history of the evolution of naval advising, the book then moves to late 19th century naval advising efforts. These generally involved individuals such as the American adventurer in China, Philo McGiffin, but also included State-sponsored formal missions such as the first such U.S. effort, Colonel John Lay's 1870s mission to Egypt. A comparative multi-national examination of the ability of non-European States such as China, Turkey, and Japan to adopt Western naval methods and doctrine, and an examination of the French naval advising mission to Peru, round out the book's pre-First World War offerings. The trends in naval advising between the World Wars, particularly their use as tools of economic and political penetration, are revealed through chapters on the British naval aviation mission to Japan, the British and French naval missions to Poland, the U.S. mission to Peru, and a comparative study of Italian naval missions in Persia, China, and Spain. The latter also reveals early ideological motivations for dispatching advising missions. The Cold War saw an intensification of military advising, including naval advising, as both the Communist and the Western Powers used advising as ideological tools. The U.S. naval missions to Nationalist China and South Vietnam are assessed, as are the Soviet naval advising efforts in East Germany and China. Together, through a wealth of original research, the studies in this book provide numerous lessons for future naval advising efforts and constitute a unique contribution to the field.
