The Gothique: Myriad Manifestations Aparajita Hazra,2023-03-06 The Gothic has come a long way from the romantic quest for the imaginary The gothic has proved to be an extremely enduring genre that has manifested itself in various forms in the cultural literary political ecological and historical aspects of human existence This anthology takes up various aspects of the Gothic ranging from ghost stories in literature and films to folklore and mythology to cultural horror to showcase how Gothic is part of an omnipresent power structure that shapes the socio cultural and psychological metanarrative that governs human ontology

Romanticism and Speculative Realism Chris Washington,Anne C. McCarthy,2019-01-24 Romanticism and Speculative Realism features a range of scholars working at the intersection of literary poetics and philosophy It considers how the writing of the Romantic era reconceptualizes the human imagination the natural world and the language that correlates them in radical ways that can advance current speculative debates concerning new ontologies and new materialisms In their wide ranging examinations of canonical and non canonical romantic writers the scholars gathered here rethink the connections between the human and non human world to envision speculative modes of social being and ecological politics Spanning historical and national frameworks from historical romanticism to contemporary post romantic ecology and from British and German romanticism to global modernity these essays examine life in all its varied forms in and beyond the Anthropocene

Intersections of Gender, Class, and Race in the Long Nineteenth Century and Beyond Barbara Leonardi,2018-12-29 This book explores the intersections of gender with class and race in the construction of national and imperial ideologies and their fluid transformation from the Romantic to the Victorian period and beyond exposing how these cultural constructions are deeply entangled with the family metaphor For example by examining the re signification of the angel in the house and the deviant woman in the context of unstable or contingent masculinities and across discourses of class and nation the volume contributes to a more nuanced understanding of British cultural constructions in the long nineteenth century The central idea is to unearth the historical roots of the family metaphor in the construction of national and imperial ideologies and to uncover the interests served by its specific discursive formation The book explores both male and female stereotypes enabling a more perceptive comparison enriched with a nuanced reflection on the construction and social function of class

Representing Place in British Literature and Culture, 1660-1830 Evan Gottlieb,2016-04-08 Revising traditional rise of the nation state narratives this collection explores the development of and interactions among various forms of local national and transnational identities and affiliations during the long eighteenth century By treating place as historically contingent and socially constructed this volume examines how

Britons experienced and related to a landscape altered by agricultural and industrial modernization political and religious reform migration and the building of nascent overseas empires In mapping the literary and cultural geographies of the long eighteenth century the volume poses three challenges to common critical assumptions about the relationships among genre place and periodization First it questions the novel's exclusive hold on the imagining of national communities by examining how poetry drama travel writing and various forms of prose fiction each negotiated the relationships between the local national and global in distinct ways Second it demonstrates how viewing the literature and culture of the long eighteenth century through a broadly conceived lens of place brings to the foreground authors typically considered minor when seen through more traditional aesthetic cultural or theoretical optics Finally it contextualizes Romanticism's long standing associations with the local and the particular suggesting that literary localism did not originate in the Romantic era but instead emerged from previous literary and cultural explorations of space and place Taken together the essays work to displace the nation state as a central category of literary and cultural analysis in eighteenth century studies
