Religious Identity and Social Change David Radford, 2015-06-19 Religious

Identity and Social Change offers a macro and micro analysis of the dynamics of rapid social and religious change occurring within the Muslim world Drawing on rich ethnographic and quantitative research in Kyrgyzstan Central Asia David Radford provides theoretical insight into the nature of religious and social change and ethnic identity transformation exploring significant questions concerning why people convert and what happens when they do so A crisis of identity occurs when religious conversion takes place especially from one major religious tradition Islam to another Christianity and where religious identity is intimately connected to ethnic and national identity Radford argues for the importance of recognising the socially constructed nature of identity involving the dynamic interplay between human agency culture and social networks Kyrgyz Christians have been active agents in bringing religious and identity transformation building upon the contextual parameters in which they are situated

Research Methods for Education Peter Newby, 2013-11-04 Written with the novice educational researcher in mind Research Methods in Education is designed to help students produce good quality valid and valuable research The text is written in an engaging style and adopts a mixed methods approach guidance on analytical procedures that require more advanced tools such as SPSS and Minitab are also provided The book is packed with exercises examples and comparative international material from other educational contexts all of which help to introduce this complex subject in an easy to use format for people that are new to research and are not confident with numerical information Peter Newby's student friendly text allows the researcher to confidently address the practical aspects of deciding on a research project designing a questionnaire or presenting conclusions in the most convincing way Of the many research books available this one stands out as it is clear logically structured explains sophisticated concepts in an accessible manner without oversimplifying them and has a format which students at undergraduate and postgraduate like In addition the powerpoint slides that accompany the book provide an excellent basis for lectures and can be edited adopted to personalise them I

anticipate using this book for quite some time on several courses Dr Pete Allison Coordinator of Masters Research courses at The Moray House School of Education The University of Edinburgh

Electronic Noses and Tongues in Food Science Maria Luz Rodriguez Mendez, 2016-02-19 Electronic Noses and Tongues in Food Science describes the electronic products of advanced chemical and physical sciences combined with intuitive integration of microprocessors advanced bioinformatics and statistics These include for example voltammetric bio electronic piezoelectric platforms made from a variety of components including nanoparticles enzyme biosensors heavy metals graphite epoxy composites metal oxide semiconductors microelectrodes microfluidic channels pre manufactured gas sensors redox enzymes and others and is an ideal resource for understanding and utilizing their power in Food Science settings Devices used to analyse one particular food item can theoretically be adapted for other food items or components This does not just mean the re deploying the physical platforms

but also the mode of bioinformatic and statistical analysis This includes artificial neural networks ANN linear discriminant analysis LDA partial least squares PLS principal component analysis PCA etc In other words there is cross transference of chemistry physics concepts techniques findings and approaches from one food to another Electronic noses and tongues are two of these devices but are advancing in application and importance This book provides examples of the use of electronic noses and tongues to characterise components that contribute to sensory or compositional profiles from ripening to harvesting and from storage of raw materials to packaging and consumption These devices are suitable for high throughput analysis quality control or to determine the nature and extent of spoilage and adulteration and have also been used to ascertain the geographical origins of food and mixtures Presents latest developments in the application of electronic nose and tongue technologies to a variety of food specific needs Includes both electronic nose electronic tongue and combined technology insights Each chapter has sections on The physical and chemical platforms Analysis of specific foods Applications to other foods and areas of food science
