their relevance is not only context specific but should also be assessed in terms of the aspirations and needs of ordinary citizens across the continent Drawing on analyses and evidence from both the natural and social sciences the book demonstrates that progress towards the SDGs must meet demands for improving human well being under diverse and challenging socio economic political and environmental conditions Examples include those from the mining industry public health employment and the media In closing it highlights how international collaboration in the form of research networks can enhance the production of critical knowledge on and engagement with the SDGs in Africa
