Rimai, 2018-11-30 This book provides a

strategic framework for cost efficient engineering of market moving patent portfolios by organizing patent engineering efforts around the problems that innovators solve for their customers and not the technologies developed to solve these problems Patents are a vital asset in the modern business world They allow patent holders to introduce new products in to a market while deterring other market players from simply copying innovative features without making comparable investments in research and development In years past a few patents may have provided adequate protection That is no longer the case In today's world it is critical that innovative companies protect the features of their products that give them a competitive advantage with a family or portfolio of patents that are strategically generated to protect the market position of the patent holder A patent portfolio that deters competitors from introducing competitive products in a timely manner can be worth billions of dollars Anything less than this is an expensive and possibly fatal distraction This book provides a strategic framework for cost efficient engineering of patent portfolios that protect your investments in research and development and that extend the market advantages that these investments provide The book illustrates the use of the problem centric framework to enable the efficient creation of individual patents and patent portfolios that have significant value in and by themselves and allow a company to control its product market It also introduces the concept of a patent engineer whose role it is to organize input from legal business and technical communities and organize portfolios and patents using the problem centric framework **The Mammoth Book of Inside the Elite Forces** Nigel Cawthorne, 2012-03-01 The most

comprehensive and up to date guide to American and British special forces covering all aspects of their equipment training and deployment in the Iraq age of warfare It takes a special kind of person to join the Special Forces and those to pass the stringent entrance requirements are subjected to the most rigorous training They're trained to be super fit taught to survive in the most adverse conditions and turned into killing machines This book reveals what makes these men tick and everything you need to know to become one of them It covers all the types of training required for fitness combat survival navigation

communication infiltration interrogation extraction and evasion And it details the full array of weapons used from small arms and knives to explosives and air back up Also included are full listings of all the units including the SAS Green Berets SBS Navy SEALs Delta Force Army Rangers and their deployment in present day conflicts such as Desert Storm Somalia Afghanistan Iraq and anti terrorist operations
