Yanomamo The Last Days Of Eden:

Yanomamo: the Last Days of Eden N. Chagnon, 1998-12-01 *Yanomamö*, 1992 *Yanomamö* Napoleon A. Chagnon, 1992 Describes an isolated tribe of Indians who live in the rainforests of Brazil and Venezuela and recounts how the intrusion of gold miners has brought disease deforestation and land expropriation *The Ethics of Anthropology and Amerindian Research* Richard J. Chacon, Rubén G. Mendoza, 2011-12-14 The decision to publish scholarly findings bearing on the question of Amerindian environmental degradation warfare and or violence is one that weighs heavily on anthropologists This burden stems from the fact that documentation of this may render descendant communities vulnerable to a host of predatory agendas and hostile modern forces Consequently some anthropologists and community advocates alike argue that such culturally and socially sensitive and thereby politically volatile information regarding Amerindian induced environmental degradation and warfare should not be reported This admonition presents a conundrum for anthropologists and other social scientists employed in the academy or who work at the behest of tribal entities This work documents the various ethical dilemmas that confront anthropologists and researchers in general when investigating Amerindian communities The contributions to this volume explore the ramifications of reporting and specifically of non reporting instances of environmental degradation and warfare among Amerindians Collectively the contributions in this volume which extend across the disciplines of archaeology anthropology ethnohistory ethnic studies philosophy and medicine argue that the non reporting of environmental mismanagement and violence in Amerindian communities generally harms not only the field of anthropology but the Amerindian populations themselves *Darkness in El Dorado* Patrick Tierney, 2001 What Guns Germs and Steel did for colonial history this book will do for modern anthropology telling the explosive story of how ruthless journalists self serving anthropologists and obsessed scientists placed the Yanomami one of the Amazon basin s oldest tribes on the cusp of extinction A New York Times Notable Book of photos **Trauma Spectrum** Robert Scaer, 2005-07-05 Bob Scaer a leading neurologist offers hope to those who wish to transform trauma and better understand their lives *The Buried Soul* Timothy Taylor, 2005-08-15 Do cannibals exist Is there evidence for contemporary human sacrifice What are vampires The Buried Soul charts the story of the human response to death from prehistory to the present day This book is a radical adventure into the sepulchral world **On to the Sanumás: S** Thomas J. Sorkness, 2024-11-26 On to the Sanumas is a firsthand account of Don and Barb Borgman s forty year effort and achievement to place the word of God into the hands of the Sanumas a tribe of the Yanomami people of Brazil The edited compilation of personal letters journal entries and newsletters are a detailed record of their many years with the tribe and the friendships they established among them It is a story filled with toil adversity trials and even tragedy yet also one of joy and evidence of God s faithfulness and love The book provides great insight into the Sanuma people and their way of life as many experienced change from animism and shamanism to faith in Jesus Christ It is also a historical record of the first contact expeditions to the Yanomami people by

missionaries of Unevangelized Fields Mission in the late 1950s and early 1960s These are all recorded by Borgman This is an important work in that it chronicles not only the lifework of this missionary couple and family but also another chapter of the ongoing expansion of God's kingdom to the ends of the earth It is a valuable read for both academics and laypersons in the church

Chimpanzees of the Lakeshore Toshisada Nishida,2011-12-01 Chimpanzees are humanity's closest living relations and are of enduring interest to a range of sciences from anthropology to zoology In the West many know of the pioneering work of Jane Goodall whose studies of these apes at Gombe in Tanzania are justly famous Less well known but equally important are the studies carried out by Toshisada Nishida on the eastern shore of Lake Tanganyika Comparison between the two sites yields both notable similarities and startling contrasts Nishida has written a

comprehensive synthesis of his work on the behaviour and ecology of the chimpanzees of the Mahale Mountains With topics ranging from individual development to population specific behavioural patterns it reveals the complexity of social life from male struggles for dominant status to female travails in raising offspring Richly illustrated the author blends anecdotes with powerful data to explore the fascinating world of the chimpanzees of the lakeshore **In Search of Hospitality** Conrad Lashley, Alison Morrison, 2013-10-11 In Search of Hospitality is a unique contribution to the study of hospitality exploring the practice of hospitality across disciplines and adopting an international perspective where appropriate In Search of Hospitality brings together an extraordinary collection of leading researches and writers in hospitality sociology philosophy and social history providing a truly global perspective on hospitality focuses the study of hospitality across the range of human social and economic settings provides a reference point for the future development of hospitality as an academic discipline This text is ideal for students and academics in both the applied fields of hospitality and tourism studies and general academic fields in business studies and behavioral sciences For practitioners in hospitality leisure and tourism businesses the text provides a provocative and informative guide to understanding and providing hospitality in commercial contexts Culturicide, Resistance, and Survival of the Lakota James V. Fenelon, 2014-06-03 This ground breaking work develops theories and methods of analyzing the United States domination of Native Americans through a study of the Lakota society known as the Sioux Nation of Indians Two centuries of struggle between nations and cultures during the U S expansion over North America are described utilizing policy BIA and cross cultural US Lakota history with insightful additions to understanding the Tetonwan Sioux Contributing new forms of analysis to the study of attempted domination and destruction of Native American societies the author explores the concept of culturicide in relation to theories of genocide and cultural domination He links resistance by traditionalists and activists to cultural survival in charts of U S and Lakota policies and counter policies The study provides maps to identify struggles over land and shows how social institutions have been used to attack Lakota culture The author provides documented recent events to illustrate contemporary Lakota social life often from an insider s point of view The work provides a framework for understanding similar conflicts for other Native Nations Also includes maps James Fenelon is Dakota Lakota and is Assistant Professor of Sociology at John Carroll University Bibliography Index *Genetic Enslavement* Bruce L. Gary, 2011-06 Every living thing is assembled by its genes This is a crucial starting point for exploring a fundamental human dilemma As stated so starkly by Richard Dawkins a human is a lumbering machine created for the task of safeguarding and propagating the all important genes within I would add that since the machine s behavior is driven by brain circuits pre wired by those genes sometimes we are prone to doing things which work against our individual best interest in order to advance the cause of the genes In other words some of our genes are our enemies outlaw genes because they jeopardize individual well being as they work to assure themselves genetic immortality Every thinking person must face the following dilemma How can I achieve liberation from genetic pitfalls when

my values and thinking are so profoundly influenced by the very same genes that have created those pitfalls The more one tries to answer this question the harder it is to imagine that an answer is possible Nevertheless this is a challenge that can become irresistibly fascinating This book is an attempt to bravely explore one of Humanity's most profound existential dilemmas The fate of a civilization is also affected by the outlaw genes especially those responsible for a feeling of discontent with civilization and a vague preference for a simpler society which I would describe as resembling those found in the human ancestral environment This book explores how a flawed human nature undermines every civilization starting a decline and eventual fall Those of us born during the 20th Century are lucky for having seen the best of times for our civilization and as a questionable bonus we may now witness from close up the forces that have condemned every past civilization to ruin

Silent Travelers Alan M. Kraut, 1995-03 Epidemics and immigrants have suffered a lethal association in the public mind from the Irish in New York wrongly blamed for the cholera epidemic of 1832 and Chinese in San Francisco vilified for causing the bubonic plague in 1900 to Haitians in Miami stigmatized as AIDS carriers in the 1980s *Silent Travelers* vividly describes these and many other episodes of medicalized prejudice and analyzes their impact on public health policy and beyond The book shows clearly how the equation of disease with outsiders and illness with genetic inferiority broadly affected not only immigration policy and health care but even the workplace and schools The first synthesis of immigration history and the history of medicine *Silent Travelers* is also a deeply human story enriched by the voices of immigrants themselves Irish Italian Jewish Latino Chinese and Cambodian newcomers among others grapple in these pages with the mysteries of modern medicine and American prejudice Anecdotes about famous and little known figures in the annals of public health abound from immigrant physicians such as Maurice Fishberg and Antonio Stella who struggled to mediate between the cherished Old World beliefs and practices of their patients and their own state of the art medical science to Typhoid Mary and the inspiring example of Mother Cabrini Alan M Kraut tells of the newcomers founding of hospitals to care for their own the Halls of Great Peace actually little more than hovels where lepers could go to die set up by Chinese immigrants the establishment of St Vincent's Hospital in New York as an institution sensitive to the needs of Catholic patients and the creation of a tuberculosis sanitarium in Denver by Eastern European Jewish tradespeople who managed to scrape together 120 in contributions at their first meeting Tapping into a rich array of sources from turn of the century government records to an advice book aimed at Italians financed by the DAR from the photographs of Jacob Riis to the records of insurance companies and visiting nurse services as well as poems songs stories and letters of patients this book evokes an intimate sense of the poignancy of the immigrant odyssey Amid growing concern over using AIDS to exclude immigrants and ongoing debates about multi culturalism this look at how earlier generations struggled with such problems is especially valuable

Interface between Literature and Science Victoria Carpenter, 2015-05-13 The boundaries of science and literature are permeable they are continuously crossed and illuminated by a variety of narrative forms and their

interpretations Changes in our perception of the world are informed in equal measure by scientific and humanistic disciplines This volume treats both literary and scientific texts as products of the human mind therefore abiding by all the rules it creates scientific and humanistic alike The volume does not propose to replace all literary or discourse analysis with a cross disciplinary science based approach but rather uses this theoretical stance when more conventional means fail to explain or even explore the intricacies of a text It argues that scientific discourse can also be analysed through the prism of literary theories since all texts are governed in varying measure by the unity of contexts that characterize their nature the process of their creation and their place in the cognitive realm of humanity This approach will allow the nature and limitations of scientific research to be questioned while opening up more venues to explore scientific creativity that crosses the subject boundaries of science and humanities Latin American literature offers many examples of the interconnection between literary and scientific discourse Notwithstanding the often explored relationship between Jorge Luis Borges s literary themes and contemporary scientific discoveries a more general question should be asked is the influence of scientific thought a privilege of the select few or is it indeed an all pervading experience in Latin American literary narrative from late modernism to present day This book explores the texts that overtly incorporate scientific content or are structured in such a way that immediately reminds the reader of a scientific phenomenon it will also examine the texts that are presented in such a way that a conventional literary analysis does not help penetrate the many narrative layers that the text comprises The volume offers cross disciplinary readings of such authors as Jorge Luis Borges Gabriel Garc a M rquez Ernesto S bato and Gustavo Sainz to name but a few

Wysong, 2000-09 Living Life as if Thinking Matters Why dissent is crucial to health happiness hope and a better world This is a book about living life better and solving its dilemmas by putting thinking ahead of popular beliefs We are all born on the starting line of life with blank mental slates Then each of us has our mind filled in by parents schools peers and experts The result is a society stuffed with given beliefs none of which we own and as you will learn in this book most of which are wrong Although important questions are often debated there seems to be no satisfying solutions Instead shortsighted agendas prevail money dictates decisions and ethics seems a thing of the past We all sense this misdirection and can feel helpless as the world spirals out of control Since ultimately everything in life happens because of the way we think solutions depend upon thinking too That does not mean playing the victim and relying on others but reaching within to see the sense goodness and direction that lie there Dr Wysong helps readers tap into their unlimited resources and take control All of life s important topics are discussed in this encyclopedic wise and helpful book including how to achieve optimal health think correctly about politics family love sex the environment economics government and social issues and how to self improve and cultivate conscience If you would like to understand life better be healthier happier have meaning contribute to a better world and avoid some bumps and bruises along the way this is your guidebook
