

Year 11 Term 1 Food Technology Notes

Food Availability and Selection

Influences of Food Availability

Food Security

What is Food Security?

According to FAO (Food and Agricultural Organisation), food security is the human right for people at all times to have physical, social and economic access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy lifestyle

Barriers to Food Security

- Remoteness
- Low income
- Low education

Food Safety Includes:

- Adequacy of food supply and availability
- Stability of supply without fluctuations or shortages
- Accessibility and affordability of food
- Quality and safety of food

Factors causing food insecurity (can affect food availability):

- The financialisation of food – used as a 'commodity' for money rather than the right to food
- Market dominance of multinational agribusinesses and exporters
- Lack of access to farming land needed to produce food and generate income
- Land 'grabbing' by large business who take over land that has been traditionally farmed by families
- Natural disasters
- Farmland is being diverted to grow plants for biofuels rather than for food supply (e.g. sugar cane)
- Conflict of war - results in shortages
- Unfair trading rules
- Food wastage

Dimensions of Food Security:

- Availability
- Stability
- Access
- Utilisation
