Voices For Children Rhetoric And Public Policy:

Voices for Children William T. Gormley, 2012-10-05 The United States spends more on programs for the elderly than it does on programs that enhance child development and improve child welfare Why has public policy neglected the development phase of young Americans lives not only in substantive dollars spent but also in program design and implementation Noted child care and education policy expert William Gormley highlights the portrayal of children s issues in both the mass media and in public policymaking to explain why children have gotten short shrift A key explanation is the limited mass media coverage of strong arguments in support of children s programs After documenting changes in rhetoric on children and public policy over time and variations across policy domains and government venues Gormley demonstrates that some issue frames are more effective than others in persuading voters In two randomized experiments he finds that economic frames are more effective than moralistic frames in generating public support for children s programs Independent voters are especially responsive to economic frames In several illuminating case studies in Connecticut Utah North Carolina and Pennsylvania he finds that strong rhetoric makes a difference but that it is sometimes eclipsed by even stronger political and economic constraints *Voices for Children* offers a fresh perspective on raging debates over child health child poverty child welfare and education programs at the federal and state levels It finds some hopeful examples that could transform how we think about children s issues and the kinds of public policies we adopt

Voices for Children William T. Gormley (Jr.), 2012 Focuses on why children s issues and programs have been given less attention and monies compared to those for the elderly with emphasis on how the mass media have covered children s issues and how this has influenced public opinion and in turn lawmakers Provided by the publisher
