DBT? Skills Manual for Adolescents Jill H. Rathus, Alec L. Miller, 2014-11-20 Dialectical behavior therapy has

revolutionized cognitive behavioral therapies with constructs such as mindfulness and acceptance now permeating behavioral approaches. Adolescents differ from adult clients with regard to emotional and cognitive developmental level and context; they overwhelmingly attend school and reside with their families and depend on them for daily functioning including for getting to therapy. Thus we considered developmentally relevant as well as family based targets, cognitive processing and capability differences, distinct liability issues and interventions with their environments. Our adapted adolescent skills handouts are being used in multiple research settings; many clinical settings around the world employ some version of our materials. The publication of this manual makes them more widely available along with group management strategies and skills teaching notes to assist the DBT skills trainer working with adolescents. Coaching Review, 1983. *Athletic Journal*, 1982 Vols 9-12 include proceedings of the 8th-11th annual meeting of the American Football Coaches Association and of the National Association of Basketball Coaches of the United States 3d-6th annual meeting. **High Performance Disability Sport Coaching** Geoffrey Z. Kohe, Derek M. Peters, 2016-08-25. As the profile of disability sport has risen so has the emphasis grown beyond participation to include the development of a high performance environment. This book is the first to take an in depth look at the role of coaches and coaching in facilitating the professionalisation of disability sport in raising performance standards and as an important vector for the implementation of significant political, socio-cultural and technological change. Using in depth case studies of elite disability sport coaches from around the world, the book offers a framework for critical reflection on coaching practice as well as the reader's own experiences of disability sport. The book also evaluates the vital role of the coach in raising the bar of performance in a variety of elite level disability sports including athletics, basketball, boccia, equestrian sport, rowing, soccer, skiing, swimming and volleyball. Providing a valuable evidence based learning resource to support coaches and students in developing their own practice, *High Performance Disability Sport Coaching* is essential reading for all those interested in disability sport coaching practice, elite sport development and the Paralympic Games.
