A Lifetime's Non-Ordinary Events Richard F. Ward,2015-06-05 In about the year 1980 I began recording the non ordinary events people met and places visited in my life Eventually I looked back into my past life to recount past events people and places which came to mind for the earlier years As subsequent years rolled by I had assembled a list of 172 items which I consider unusual or non ordinary in my lifetime My next step in the evolution of this work was to elaborate on each of the parts to expand on each of the one or two line statements When assembled it dawned on me that it provided an autobiography albeit different from a usual biography of my life Hopefully the treatment will render the human story more entertaining to the average reader Having reached the middle of my octogenarian decade perhaps a better perspective can thus be obtained The reader s entertainment is the effect I wish to impart If this should ensue the effort shall not have been merely self aggrandizement

Livable Cities from a Global Perspective Roger Caves,Fritz Wagner,2018-05-11 Livable Cities from a Global Perspective offers case studies from around the world on how cities approach livability They address the fundamental question what is considered livable The journey each city has taken or is currently taking is unique and context specific There is no such thing as a one size fits all approach to livability Some cities have had a long history of developing livability policies and programs that focus on equity economic and environmental concerns while other cities are relatively new to the game In some areas government has taken the lead while in other areas grassroots activism has been the impetus for livability policies and programs The challenge facing our cities is not simply developing a livability program We must continually monitor and readjust policies and programs to meet the livability needs of all people The case studies investigate livability issues in such cities as Austin

Texas Helsinki Finland London United Kingdom Warsaw Poland Tehran Iran Salt Lake City United States Rio de Janeiro Brazil Sydney Australia and Cape Town South Africa The chapters are organized into such themes as livability in capital city regions livability and growth and development livability and equity concerns livability and metrics and creating livability Each chapter provides unique insights into how a specific area has responded to calls for livable cities In doing so the book adds to the existing literature in the field of livable cities and provides policy makers and other organizations with information and alternative strategies that have been developed and implemented in an effort to become a livable city

Walking Through Social Research Charlotte Bates,Alex Rhys-Taylor,2017-04-11 As an ethnographic method walking has a long history but it has only recently begun to attract focused attention By walking alongside participants researchers have been able to observe experience and make sense of a broad range of everyday practices At the same time the idea of talking and walking with participants has enabled research to be informed by the landscapes in which it takes place By sharing conversations in place and at the participants pace sociologists are beginning to develop both a feel for and a theoretical understanding of the transient embodied and multisensual aspects of walking The result as this collection demonstrates is an understanding of the social world evermore congruent with people s lived experiences of it This interdisciplinary collection comprises a unique journey through a variety of walking methodologies The collection highlights a range of possibilities for enfolding sound smell emotion movement and memory into our accounts illustrating the sensuousness skill pitfalls and rewards of walking as a research practice Each chapter draws on original empirical research to present ways of walking and to discuss the conceptual practical and technical issues that walking entails Alongside feet on the ground the devices and technologies that make up hybrid research mobilities are brought to attention The collection is bookended by two short pedestrian essays that take the reader on illustrative urban walks suggesting routes through the city as well as ways in which the reader might make their own path through walking methods An innovative title Walking Through Social Research will be of interest to undergraduate and postgraduate students researchers and academics who are interested in Sociology

that of the 21st century To highlight certain places of interest on each walk the author has included his own pen and ink illustrated sketches to provide a topographical and artistic account of each district in a manner that he feels Dickens would have approved of
