The Tropical Rain Forest An Ecological Study:

The Tropical Rain Forest P. W. Richards, 1996-08-08 The rain forests of tropical America Africa Asia and Australia are rapidly vanishing With a focus on ecology this book discusses rain forests as complex natural systems that are continually changing in response to climate and soil conditions as well as to shifting cultivation logging and other human activities The completely revised edition includes new chapters on climate contributed by R P D Walsh microclimates and hydrology contributed by R P D Walsh soils contributed by I C Baillie and an appendix on quantitative methods contributed by P Greig Smith This book first published in 1952 is now a classic and represents an important record of what has become of the rain forest in the twentieth century and will be meaningful reading for botanists ecologists tropical biologists conservationists and general readers The Tropical Rain Forest, an Ecological Study, by P. W. Richards,... P. W. Richards, 1952 **The**

tropical rain forest Paul W. Richards, 1972 The Tropical Rain Forest P. W. Richards, 1952 **The Tropical Rain Forest** Paul Westmacott Richards, 1976 The Tropical Rain Forest P. W. Richards, 1957 *The Tropical Rain Forest* Marius Jacobs, 2012-12-06 In recent years tropical forests have received more attention and have been the subject of greater environmental concern than any other kind of vegetation There is an increasing public awareness of the importance of these forests not only as a diminishing source of countless products used by mankind nor for their effects on soil stabilization and climate but as unrivalled sources of what today we call biodiversity Threats to the continued existence of the forests represent threats to tens of thousands of species of organisms both plants and animals It is all the more surprising therefore that there have been no major scientific accounts published in recent years since the classic handbook by Paul W Richards The Tropical Rain Forest in 1952 Some excellent popular accounts of tropical rain forests have been published including Paul Richard s *The Life of the Jungle* and Catherine Caulfield s *In the Rainforest and Jungles* edited by Edward Ayensu There have been numerous often conflicting assessments of the rate of conversion of tropical forests to other uses and explanations of the underlying causes and in 1978 UNESCO UNEPI FAO published a massive report The Tropical Rain Forest which although full of useful information is highly selective and does not fully survey the enormous diversity of the forests People of the Tropical Rain Forest Julie Sloan Denslow, Christine Padoch, 1988-01-01 Looks at the depiction of tropical rain forests in movies and art discusses government policy business exploitation and the future of the rain forest and describes the lives of forest people in South America Africa and Asia **Tropical Rain Forests** Richard T. Corlett, Richard B. Primack, 2011-03-03 The first edition of *Tropical Rain Forests an Ecological and Biogeographical Comparison* exploded the myth of the rain forest as a single uniform entity In reality the major tropical rain forest regions in tropical America Africa Southeast Asia Madagascar and New Guinea have as many differences as similarities as a result of their isolation from each other during the evolution of their floras and faunas This new edition reinforces this message with new examples from recent and on going research After an introduction to the environments and geological histories of the major rain forest regions subsequent

chapters focus on plants primates carnivores and plant eaters birds fruit bats and gliding animals and insects with an emphasis on the ecological and biogeographical differences between regions This is followed by a new chapter on the unique tropical rain forests of oceanic islands The final chapter which has been completely rewritten deals with the impacts of people on tropical rain forests and discusses possible conservation strategies that take into account the differences highlighted in the previous chapters This exciting and very readable book illustrated throughout with color photographs will be invaluable reading for undergraduate students in a wide range of courses as well as an authoritative reference for graduate and professional ecologists conservationists and interested amateurs

Tropical Rain Forest Ecology, Diversity, and Conservation Jaboury Ghazoul, Douglas Sheil, 2010-05-20 This is a comprehensive attractive and readable introduction to tropical rain forest ecology biogeography and management It tackles the subject at local regional and global scales and is both up to date and fully integrated across disciplines
