## **Measuring National Innovation Performance**

Frane Adam, 2013-10-09 This book provides a critical re examination of the Innovation Union Scoreboard IUS as the main tool

used by the European Commission and other policy making bodies to measure national innovation capacity Given that contemporary societies and economies are to a great extent characterised by the processes of production dissemination and application re combination of knowledge the accurate monitoring and measurement of R D efficiency and innovation performance on national regional and firm level are of outmost importance The contextual reconstruction of the model of indicators used by IUS reveals that the accuracy and validity of measurement are not satisfactory and that substantial modifications of metrics are needed to achieve stronger theoretical significance and policy relevance In this work the epistemic turn is emphasised and offered as an alternative namely in the sense of the shift from a mechanist positivist orientation toward a more reflective and contextual post positivist approach Social Banking and Social Finance Roland Benedikter, 2011-01-13 For over 2 000 years banks have served to facilitate the exchange of money and to provide a variety of economic and financial services During the most recent financial collapse and subsequent recession beginning in 2008 banks have been vilified as perpetrators of the crisis the public distrust compounded by massive public bailouts Nevertheless another form of banking has also emerged with a focus on promoting economic sustainability investing in community providing opportunity for the disadvantaged and supporting social environmental and ethical agendas Social Banking and Social Finance traces the emergence of the bank with a conscience and proposes a new approach to banking in the wake of the economic crisis Featuring innovations and initiatives in banking from Europe Canada and the United States Roland Benedikter presents an alternative to traditional banking practices that are focused exclusively on profit maximization He argues that social banking is not about changing the system but about improving some of its core features by putting into use the triple bottom line principle of profit people planet Important lessons can be learned by the success of social banks that may be useful for the greater task of improving the global financial system and avoiding economic crises in the future
