The Dialectical Method of Nagarjuna Kamaleswar Bhattacharya, 1978-01-01 Though only a minor work in form regards its contexts the Vignahavyavartani is a fundamental text of Madhyamaka as well as of the early Indian dialectical tradition Not only does it admirably illustrate the dialectical method followed by Nagarjuna the founder of the school but it also clarifies the idea of Voidness which has been so often misunderstood not only in modern times and abroad but in India itself and in Nagarjuna's own time Long lost in India this text was fortunately discovered by Rahula Sankrityayana in a Tibetan monastery

The Problem of Two Truths in Buddhism and Vedānta G.M.C. Sprung, 2012-12-06 It would be a bulky and intricate volume indeed that treated adequately of the problem of two truths in Buddhism and Vedānta the present volume is slim and unpretentious Not the less incisive for that it is hoped but certainly neither systematic nor complete and this in several senses Not all schools of Buddhism are dealt with Theravada Indian Yogacara and the Logicians are missing among the Indian schools and there is no reference to Chinese and Japanese Buddhism The Vedānta discussed is only Advaita non dualist and that virtually limited to Sankara Nor does the volume as a whole take up the problem of two truths thematically though each paper raises the philosophical questions its author thinks appropriate The title The Problem of Two Truths in Buddhism and Vedānta promises more than the book itself contains The reason for this is given in the prefatory Note each chapter is a paper read and discussed at a working conference All the papers from the conference are here published and no others The book has thus the contours dictated by the availability of scholars at the time of the conference

The Metaphysics of Philosophical Daoism Kai Zheng, 2020-11-09 Drawing on evidence from a wide range of classical Chinese texts this book argues that xing'er shangxue the study of beyond form constitutes the core argument and intellectual foundation of Daoist philosophy The author presents

Daoist xingershangxue as a typical concept of metaphysics distinct from that of the natural philosophy and metaphysics of ancient Greece since it focusses on understanding the world beyond perceivable objects and phenomena as well as names that are definable in their social political or moral structures In comparison with other philosophical traditions in the East and West the book discusses the ideas of dao de and spontaneously self so which shows Daoist xingershangxue s theoretical tendency to transcendence The author explains the differences between Daoist philosophy and ancient Greek philosophy and proposes that Daoist philosophy is the study of xingershangxue in nature providing a valuable resource for scholars interested in Chinese philosophy Daoism and comparative philosophy **Gift of Language** Alexander García
