Steven Pinker At last stupidity explained And by some of the world's smartest people among them Daniel Kahneman Dan Ariely Alison Gopnik Howard Gardner Antonio Damasio Aaron James and Ryan Holiday And so I proclaim o idiots of every stripe and morons of all kinds this is your moment of glory this book speaks only to you But you will not recognize yourselves Stupidity is all around us from the coworker who won't stop hitting reply all to the former high school classmate posting conspiracy theories on Facebook But in order to vanquish it we must first understand it In *The Psychology of Stupidity* some of the world's leading psychologists and thinkers including a Nobel Prize winner and bestselling authors will show you why smart people sometimes believe in utter nonsense how our lazy brains cause us to make the wrong decisions why trying to debate fools is a trap how media manipulation and Internet overstimulation make us dumber why the stupidest people don't think they're stupid The wisdom and wit of these experts are a balm for our aggrieved souls and a beacon of hope in a world of morons

A Fast and Frugal Finance William P. Forbes, Aloysius Obinna Igboekwu, Shabnam Mousavi, 2019-11-15 *A Fast and Frugal Finance* Bridging Contemporary Behavioural Finance and Ecological Rationality adds psychological reality to classical financial reasoning It shows how financial professionals can reach better and quicker decisions using the fast and frugal framework for decision making adding dramatically to time and outcome efficiency while also retaining accuracy The book provides the reader with an adaptive toolbox of heuristic tools and classification systems to aid real world decisions Throughout financial applications are presented alongside real world examples to help readers solve established problems in finance including stock buying and selling decisions when faced with not only risk but fundamental uncertainty The book concludes by describing potential solutions to financial problems in the forefront of contemporary debates and calls for taking psychological insights seriously Demonstrates how well constructed fast and frugal models can outperform standard models in time and outcome efficiency Focuses on how financial decisions are made in reality using heuristics rather than how such decisions should be made Discusses how cognition and the decision making context interact in producing fast and frugal choices that follow ecological rationality Explores the development of decision making trees in finance to aid in decision making

The Investor's Paradox Brian Portnoy, 2024-03-26 Portnoy has produced the first great text on picking fund managers one of the best written investment books you'll ever find Don Phillips Morningstar A paradox we all face is the natural desire for more choice in our lives yet the more we have the less satisfied we become whether we're at the grocery store choosing doctors or flipping through hundreds of TV channels So too with investing where there are literally tens of thousands of funds from which to choose Hence the investor's paradox We crave abundant investment choices to conquer volatile markets yet with greater flexibility the more overwhelmed and less empowered we become Leveraging the fresh insights of behavioral economics Brian Portnoy demystifies the opaque world of elite hedge funds addresses the limits of mass market mutual funds and discards the false dichotomy between traditional and alternative investments He also explores why hedge funds have recently become such a controversial and disruptive force Turns out it's not the splashy headlines

spectacular trades newly minted billionaires aggressive tactics but something much more fundamental The stratospheric rise to prominence and availability of alternative strategies represents a further explosion in the size and complexity of the choice set in a market already saturated with products It constitutes something we all both crave and detest The Investor's Paradox lights a path toward simplicity in a world of dangerous markets and overwhelming choice Written in accessible jargon free language with a healthy skepticism of today's money management industry it offers not only practical tools for investment success but also a message of empowerment for investors drowning in possibility

The Warren Buffett Way Robert G. Hagstrom, 2013-09-30 Warren Buffett is the most famous investor of all time and one of today's most admired business leaders He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen The first two editions of *The Warren Buffett Way* gave investors their first in depth look at the innovative investment and business strategies behind Buffett's spectacular success The new edition updates readers on the latest investments by Buffett And more importantly it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett New material includes How to think like a long term investor just like Buffett Why loss aversion the tendency of most investors to overweight the pain of losing money is one of the biggest obstacles that investors must overcome Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H J Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks Hagstrom writes but in having the fortitude to stick with sound investments in the face of economic and market uncertainty The new edition explains the psychological foundations of Buffett's approach thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation

The Success Equation Michael J. Mauboussin, 2012 In this provocative book Michael Mauboussin offers the structure needed to analyze the relative importance of skill and luck offering concrete suggestions for making these insights work to your advantage by making better decisions

Getting to Green Frederic C. Rich, 2016-04-14 Regardless of your place on the political spectrum there is much to admire in this book which reminds us that the stewardship of nature is an obligation shared by all Americans U S Senator Angus S King Jr The Green movement in America has lost its way Pew polling reveals that the environment is one of the two things about which Republicans and Democrats disagree most Congress has not passed a landmark piece of environmental legislation for a quarter century As atmospheric CO2 continues its relentless climb even environmental insiders have pronounced the death of environmentalism In *Getting to Green* Frederic C Rich argues that meaningful progress on urgent environmental issues can be made only on a bipartisan basis Rich reminds us of American conservation s conservative roots and of the bipartisan political consensus that had Republican congressmen voting for and Richard Nixon signing the most important environmental legislation of the 1970s He argues that faithfulness to conservative principles requires the GOP to support environmental protection while at the same time he criticizes the Green movement for having drifted too far to the left and too often appearing hostile to business and economic growth With a clear eyed understanding of past failures and a realistic view of the future *Getting to Green* argues that progress on environmental issues is within reach The key is encouraging Greens and conservatives to work together in the space where their values overlap what the book calls Center Green Center Green takes as its model the hugely successful national land trust movement which has retained vigorous bipartisan support Rich s program is pragmatic and non ideological It is rooted in the way America is not in a utopian vision of what it could become It measures policy not by whether it is the optimum solution but by the two part test of whether it would make a meaningful contribution to an environmental problem and whether it is achievable politically Application of the Center Green approach moves us away from some of the harmful orthodoxies of mainstream environmentalism and results in practical and actionable positions on climate change energy policy and other crucial issues This is how we get to Green

A Theory of Punishable Participation in Universal Crimes Terje Einarsen, Joseph Rikhof, 2018-12-07 This study is the second in the four part series entitled *Rethinking the Essentials of International Criminal Law and Transitional Justice* While the first volume *The Concept of Universal Crimes in International Law* explored the parameters and theories related to crimes under international law this book examines the notion of punishable participation in such crimes It presents a general theory of personal criminal liability and provides a comprehensive overview of all forms of criminal participation in international law The authors examine numerous primary materials in international and transnational criminal law both historical and current relating to both international and domestic jurisprudence They also review academic literature that attempts to explain and

bring consistency to the jurisprudence as well as other sources such as reports of the International Law Commission This rich empirical tapestry is then used to test and further develop an overarching conceptual theory and matrix that provides a better understanding of the boundaries of personal criminal liability *lex lata* and *lex ferenda* and of the relationship between the various forms of punishable participation in universal crimes Like the first volume this book makes a valuable

contribution to a more coherent and practical understanding of international criminal law **Thinking, Fast and Slow**

Save Time Summaries Staff,2014-03-30 WARNING This is not the actual book Thinking Fast and Slow by Daniel Kahneman Do not buy this Summary Review Analysis if you are looking for a full copy of this great book This is not a light read which is why this expert summary is of great importance Use it to discover the book s prominent messages in a format that is easy to absorb Besides the easy to digest format another great benefit of this summary of Thinking Fast and Slow is our Putting it Together section that not only tells you what to take away from this book but it also gives you the tools you need to apply the ideas to modern business and society Daniel Kahneman s long awaited Thinking Fast and Slow offers a VIP tour of the mind explaining the two systems that control it as well as the benefits and drawbacks of each system System 1 is highly emotional and intuitive while System 2 uses logic and operates at a slower pace Kahneman explains the benefits of quick thinking along with the drawbacks and he details how intuition affects your behavior and thoughts Kahneman details how the mind makes choices while explaining how the use of certain techniques will help you avoid putting your foot in your mouth Thinking Fast and Slow is already the go to guide for many of today s leaders and businessmen so why not be next **The Death of**

Human Capital? Phillip Brown,Hugh Lauder,Sin Yi Cheung,2020 Human capital theory or the notion that there is a direct relationship between educational investment and individual and national prosperity has dominated public policy on education and labor for the past fifty years In The Death of Human Capital Phillip Brown Hugh Lauder and Sin Yi Cheung argue that the human capital story is one of false promise investing in learning isn t the road to higher earnings and national prosperity Rather than abandoning human capital theory however the authors redefine human capital in an age of smart machines They present a new human capital theory that rejects the view that automation and AI will result in the end of waged work but see the fundamental problem as a lack of quality jobs offering interesting worthwhile and rewarding opportunities A

controversial challenge to the reigning ideology The Death of Human Capital connects with a growing sense that capitalism is in crisis felt by students and the wider workforce shows what s at stake in the new human capital while offering hope for the future **The Story Paradox** Jonathan Gottschall,2021-11-23 Storytelling a tradition that built human civilization may

soon destroy it Humans are storytelling animals Stories are what make our societies possible Countless books celebrate their virtues But Jonathan Gottschall an expert on the science of stories argues that there is a dark side to storytelling we can no longer ignore Storytelling the very tradition that built human civilization may be the thing that destroys it In The Story Paradox Gottschall explores how a broad consortium of psychologists communications specialists neuroscientists and literary

quants are using the scientific method to study how stories affect our brains The results challenge the idea that storytelling is an obvious force for good in human life Yes storytelling can bind groups together but it is also the main force dragging people apart And it s the best method we ve ever devised for manipulating each other by circumventing rational thought Behind all civilization s greatest ills environmental destruction runaway demagogues warfare you will always find the same master factor a mind disordering story Gottschall argues that societies succeed or fail depending on how they manage these tensions And it has only become harder as new technologies that amplify the effects of disinformation campaigns conspiracy theories and fake news make separating fact from fiction nearly impossible With clarity and conviction Gottschall reveals why our biggest asset has become our greatest threat and what if anything can be done It is a call to stop asking How we can change the world through stories and start asking How can we save the world from stories **Summary of Daniel**
