Political Technology Andrew Wilson, 2023-12-14 Political technology is a Russian term for the professional engineering of politics It has turned Russian politics into theatre and propaganda and metastasised to take over foreign policy and weaponise history The war against Ukraine is one outcome In the West spin doctors and political consultants do more than influence media or run campaigns they have also helped build parallel universes of alternative political reality Hungary has used political technology to dismantle democracy The BJP in India has used it to consolidate unprecedented power Different countries learn from each other Some types of political technology have become notorious like troll farms or

data mining but there is now a global wholesale industry selling a range of manipulation techniques from astroturfing to fake parties to propaganda apps This book shows that political technology is about much more than online disinformation it is about whole new industries of political engineering
