Visual Music Interpreting Songs In American Sign Language:

Visual Music Raymont L. Anderson, 2009-12-22 Over the years I have met countless people who desire to sign interpret or perform songs in ASL. It has been my experience that of those that want to do this many are unaware of how to do so in a conceptually accurate manner. There are many people stuck in the box of transliteration only because they don't know how to get out of that particular box. Many of us are not taught how to sign in a more idiomatic and visual manner let alone sign songs that are inherently more conceptual than literal. What I am presenting for you in this text is a summarized version of what I teach in my American Sign Language and Performing class at Prince George's Community College. I have selected several of the tools and skills that I have learned and have used since beginning this performance art form in 1992. Having successfully used them and taught them to others who have also successfully used I know that they work. My presentation format is similar to the way I teach the course and I hope that you find it as easy to follow and free flowing as you would in the class. While this book was written to address certain issues related to perform interpret songs in ASL I want to make sure it is clear that this text is also of benefit to those who adamantly are opposed and disinterested with music and ASL. The skills I will introduce such as conceptual accuracy use of facial expression and body language as a storytelling device use of visual vernacular acting and several Rayisms will be beneficial to anyone and everyone seeking to improve their expressive ASL skills. OK so relax take a breath turn the pages and get ready to put your hands up and sign act and dance your way to greater proficiency.

Moving Mountains Rev. Dr. Raymont L. Anderson, 2012-05-25 In life everyone at some time or another will experience what is commonly referred to as problems. Moving Mountains is a manual of sorts to assist people in the removal of life's problems. This removal process occurs by first looking at some commonly held beliefs and ideas held by our society. Secondly this removal occurs by realizing that a shift in perception is needed. As the reader continues to read and walk through the journey laid out in the pages of the book the task of noticing and in time changing existing paradigms will become the number one mission. This mission allows the reader to realize that the mountains in life problems challenges issues and traumas are blessings that can be used as stepping stones to greater awareness and increase one's ability to live a sacred life. The book guides the reader through the process of personal transformation by challenging what is believed and what the reader feels is known with various ideas and concepts that the author has found over years of study to be of immeasurable value and use so that the mountains can be moved just as Jesus the Christ said in Matthew 17:20 if you have faith as small as a mustard seed you can say to this mountain Move from here to there and it will move. Nothing will be impossible for you.

Intermediate Conversational Sign Language Willard J. Madsen, 1982 This text offers a unique approach to using American Sign Language ASL and English in a bilingual setting.
