Vital Signs Psychological Responses To Ecological Crisis:

Vital Signs Mary-Jayne Rust, Nick Totton, 2018-03-22 This anthology illustrates the range and diversity of responses from the psychological world to the multiple ecological crises with which our society is faced. Vital signs are the basic physiological measures of functioning which health practitioners use to assess how ill a patient is. This book focuses not on our physical predicament with so many of the earth's systems severely stressed and beginning to fail but on our psychological predicament. As news of this very serious situation slowly penetrates our defences we struggle as individuals and as a society to find an adequate response.

Environmental Arts Therapy Ian Siddons Heginworth, Gary Nash, 2019-11-20 *Environmental Arts Therapy: The Wild Frontiers of the Heart* describes what happens when we take the creative arts therapies and the people whom we work with out of doors in order to provide safe, structured and accompanied creative therapeutic healing experiences. The theoretical themes are developed along with illustrated examples of clinical practice across a variety of settings and locations. The work is introduced and co-edited by a pioneer in the field, Ian Siddons Heginworth, who describes the emergence of environmental arts therapy and its growth across the British Isles, supported through the training course based in London. The following 12 chapters are written by contributing authors and creative arts therapy practitioners working with children, adults and elders in schools, adult mental health and private practice in Britain and Europe. A central focus of the book is the clinical populations and settings in which clinicians work and it also describes the health benefits as well as the challenges faced when working out of doors. This is a book about the emergence of a new creative therapy modality in the British Isles. It shows the value of working with the natural cycles and seasons using an integrative arts approach including dramatic enactment, role play, poetry, art making with natural materials, storytelling and the use of bodywork through movement, sound, rhythm and the voice, all held and reflected by our encounters with and in nature. It is about our relationship with nature, creativity and therapeutic healing and is written for trainers, trainees and practitioners in the creative arts psychotherapy and ecotherapy.
