Woman-to-Woman Sexual Violence Lori B. Girshick, 2002-02-28 This controversial work examines for the first time the often taboo subject of bisexual and lesbian women who are sexually assaulted by other women National gender profile of agriculture and rural livelihoods Food and Agriculture Organization of the United Nations, 2023-11-03 The National Gender Profile of Agriculture and Rural Livelihoods Cambodia provides findings of an assessment of men's and women's roles gender division of labour and gender gaps including women's needs and constraints in the agriculture and rural development sectors in Cambodia It also presents findings from the assessment of policies and frameworks pertaining to gender equality in agricultural and rural development The assessment reveals that girls and women farmers have been more recognized and given opportunities in Cambodian political and economic activities compared to the past two decades However it also unveils the fact that gender inequalities still remain These include the persisting gender and social norms that place men and boys as superior to women and girls limited representation and opportunities in leadership tasks and roles and limited educational access to agricultural skills and related technologies Rural women in particular face limited access to and control over productive and natural resources services and to markets and other opportunities to scale up their businesses It also uncovers that there are still few women holding high ranking positions at government level with lower representation in decision making positions as compared to men Through a detailed analysis of the various sub sectors the policy framework and the main national stakeholders concrete recommendations are provided for Government FAO and other relevant partners for strengthening the integration of gender equality dimensions in agricultural and rural development policies and programmes Women and the Irish Revolution Linda Connolly, 2020-11-23 The narrative of the Irish revolution as a chronology of great men and male militarism with women presumed to have either played a subsidiary role or no role at all requires reconsideration Women and feminists were extremely active in Irish revolutionary causes from 1912 onwards but ultimately it was the men as revolutionary leaders who took all the power and indeed all the credit after independence Women from different backgrounds were activists in significant numbers and women across Ireland were profoundly impacted by the overall violence and tumult of the era but they were then relegated to the private sphere with the memory of their vital political and military role in the revolution forgotten and erased *Women and the Irish Revolution* examines diverse aspects of women's experiences in the revolution after the Easter Rising The complex role of women as activists the detrimental impact of violence and social and political divisions on women the role of women in the foundation of the new State and dynamics of remembrance and forgetting are explored in detail by leading scholars in sociology history politics and literary studies Important and timely and featuring previously unpublished material this book will prompt essential new public conversations on the experiences of women in the Irish revolution **Interpreting Sexual Violence, 1660-1800** Anne Leah Greenfield, 2015-10-06 The essays in this collection explore representations of and responses to sexual violence

physical and or sexual violence by an intimate partner in their lifetime and 6 percent in the 12 months prior to data collection. Seven percent of all respondents reported having been forced into sexual intercourse by a non partner in their lifetime 1 percent in the last 12 months. Significant risk factors associated with IPV identified using Chi square tests included lower education, female and partner cohabitation without marriage, rural residency, younger age, non consensual marriage, having been pregnant, having experienced or witnessed violence in childhood, substance abuse by the partner and the partner being unemployed and having been in prior relationships. The report documents the negative consequences of IPV for women and their children as well as the most common responses and coping mechanisms. One in three women who experienced IPV remained quiet about their experience and most survivors did not seek or receive assistance for their situation. Women most often sought help from their personal contacts, mostly their mothers rather than police, social services or other entities adequately resourced to address IPV. Several factors precluded women from accessing help; these included fear, shame and the normalcy associated with violence. Based on these findings, recommendations for policy and further research are presented.

Sexual Violence during War and Peace J. Boesten, 2014-04-16 Using the Peruvian internal armed conflict as a case study, this book examines wartime rape and how it reproduces and reinforces existing hierarchies. Jelke Boesten argues that effective responses to sexual violence in wartime are conditional upon profound changes in legal frameworks and practices, institutions and society at large.

The twenty one contributors, hailing from thirteen countries, use the framework of Silencing the Self theory to examine gender differences in depression as well as related aspects of mental and physical illness, including treatments specific to women.
