The Unknown Secrets Of How Deng Xiaoping Transformed China:

Deng Xiaoping and the Transformation of China Ezra F. Vogel, 2013-10-14 No one in the twentieth century had a greater impact on world history than Deng Xiaoping And no scholar is better qualified than Ezra Vogel to disentangle the contradictions embodied in the life and legacy of China's boldest strategist the pragmatic disciplined force behind China's radical economic technological and social transformation

Becoming China Jeanne-Marie Gescher, 2017-11-09 An account of China's past and present how a small group of people at the edges of the Yellow River evolved to become the state of China today Despite decades of a relatively open door relationship with the rest of the world China is still a mystery to many outside it How does China work what does it want why does it want it and what does its rise to global power mean for the rest of the world As the twenty first century looks set to be the stage for a battle about competing geopolitical ideals these are urgent questions for everyone with an interest in what the future might bring A world of its own China is both a microcosm and an amplification of questions and events in the wider world China's story offers us an opportunity to hold a mirror to ourselves to our own assumptions to our values and to our ideas about the most important question of all what it means to be human in the world of the state Epic in scope this is the story of how China became the state it is today and how its worldview is based on what has gone before Weaving together inspirations ideas wars and dreams Jeanne Marie Gescher reveals the heart of what it means to be Chinese and how the past impacts the present

The Great Transformation Odd Arne Westad, 2024-09-24 The first thorough account of a formative and little understood chapter in Chinese history Odd Arne Westad and Chen Jian chronicle how an impoverished and terrorized China experienced radical political changes in the long 1970s and how ordinary people broke free from the beliefs that had shaped their lives during Mao's Cultural Revolution These changes and the unprecedented and sustained economic growth that followed transformed China and the world In this rigorous account Westad and Chen construct a panorama of catastrophe and progress in China They chronicle China's gradual opening to the world the interplay of power in an era of aged and ailing leadership the people's rebellion against the earlier government system and the roles of unlikely characters overseas Chinese capitalists American engineers Japanese professors and German designers This is a story of revolutionary change that neither foreigners nor the Chinese themselves could have predicted

Red China's Green Revolution Joshua Eisenman, 2018-04-24 China's dismantling of the Mao era rural commune system and return to individual household farming under Deng Xiaoping has been seen as a successful turn away from a misguided social experiment and a rejection of the disastrous policies that produced widespread famine In this revisionist study Joshua Eisenman marshals previously inaccessible data to overturn this narrative showing that the commune modernized agriculture increased productivity and spurred an agricultural green revolution that laid the foundation for China's future rapid growth Red China's Green Revolution tells the story of the commune's origins evolution and downfall demonstrating its role in China's economic ascendance After 1970 the commune emerged as a hybrid

institution including both collective and private elements with a high degree of local control over economic decision but almost no say over political ones It had an integrated agricultural research and extension system that promoted agricultural modernization and collectively owned local enterprises and small factories that spread rural industrialization The commune transmitted Mao's collectivist ideology and enforced collective isolation so it could overwork and underpay its households Eisenman argues that the commune was eliminated not because it was unproductive but because it was politically undesirable it was the post Mao leadership led by Deng Xiaoping not rural residents who chose to abandon the commune in order to consolidate their control over China Based on detailed and systematic national provincial and county level data as well as interviews with agricultural experts and former commune members Red China's Green Revolution is a comprehensive historical and social scientific analysis that fundamentally challenges our understanding of recent Chinese economic history

The China Paradox Paul G. Clifford, 2021-12-06 In The China Paradox At the Front Line of Economic Transformation Harvard University based historian of modern China and business strategist Dr Paul G Clifford documents the twists and turns of China's dramatic and unforeseen rise over the last four decades He sheds light on the delicate and fragile balance of forces at the heart of the success of China's hybrid model explaining how the ruling Communist Party boldly led the nation's economic reforms as the surest way to preserve its grip on political power Five years after this book was first published much has changed within China and in its relationship with the world This second edition provides extensive fresh new material It explains how China has raised its game moving from a catch up mode to technological innovation in some areas while still languishing in technology dependence in other respects Earlier China had shown signs that its driving spirit was faltering with its sails flapping Under Xi Jinping renewed energy has been injected But at the same time Xi and his party have strongly reinforced their control across society and the economy posing the question of whether Xi's New Era in fact marks a retreat from the reforms This second edition contains two new chapters One profiles Huawei a national champion in advanced technology Another focuses on China's frictions with the world which have been fueled by a perception that its technology progress threatens US global dominance coupled with China's human rights record In addition against a background of the challenges faced by Alibaba and other firms there is analysis of this watershed in China's private sector's autonomy There is also extensive new insight into Xi Jinping's rule As it celebrates its 100th anniversary in 2021 the Chinese Communist Party displays strong optimism over its continued governance of China But that should not mask the longer term risks to China's development and stability if its hybrid model continues to unravel as reforms are abandoned in favor of heightened autocracy

Autocracy 2.0 Jennifer Lind, 2025-11-15

In *Autocracy 2.0*, Jennifer Lind reveals how China's leaders defied expectations and propelled the country to innovation superpower status and what that means for the balance of power and global struggle between democracy and authoritarianism. In 2008, the world watched in awe as 2,008 men pounded Fou drums in unison at the Beijing Olympics opening ceremony, a spectacle that heralded China's arrival as a global powerhouse. Yet even as China's economy skyrocketed, skeptics scoffed at its ability to lead in tech, arguing that its authoritarian institutions smother true innovation. Lind dismantles this assumption, showing that China has not just kept pace; it has in fact surged ahead. Coupling hard data with razor-sharp analysis, Lind shows that China's ascent was fueled by what she calls smart authoritarianism: a model of governance in which autocratic leaders temper tight political control with inclusive economic measures. By balancing proinnovation policies with tools of repression, China's leaders have obtained political control and economic growth. These smart authoritarians, Lind observes, are not the brass-knuckled dictators of the past; they are their polished, Savile Row-clad progeny, and they are found not only in China but also in authoritarian regimes worldwide. Compelling and incisive, *Autocracy 2.0* is a must-read for anyone seeking to understand China's meteoric rise and how today's autocrats are reshaping the technological frontier, governance, and the global balance of power.
