- ❖ apply theories to the analysis of innovations
- ❖ demonstrate the predictive capability of innovation theories
- ❖ evaluate the most appropriate theories for the analysis of innovations
- ❖ demonstrate practical benefits that can be derived from the application of innovation theories

Introduction

Innovation is not inevitable. We have already seen that there are different types of innovation. It can occur in different ways and take place at different rates. Similarly, the impact of innovation varies according to the type. This is where theory comes in. Theories help us to make sense of innovation. In particular theories enable us to identify patterns of innovation. These patterns will be linked to different types of innovation. At the same time innovation theories possess a predictive capability that allows us to indicate the likely course of innovation and the impact that it will have. Given that innovation theories allow us to make sense of innovation, they provide powerful tools of analysis. These tools mean that the analysis of innovation is not just a matter of describing what happened. Using theories one can identify patterns of innovation, make comparisons between innovations and predict possible outcomes from the process of innovation.

This chapter aims to introduce a number of theories of innovation. They come from a variety of sources, though most are closely linked to technological aspects of innovation. In addition the chapter shows how these theories can be used as tools for analysing innovations and provides scope for gaining practical experience of doing this. This should enable the reader to come to a clearer appreciation of the nature of innovation.

Rogers, 2003-08-16 Now in its fifth edition *Diffusion of Innovations* is a classic work on the spread of new ideas In this renowned book Everett M Rogers professor and chair of the Department of Communication Journalism at the University of New Mexico explains how new ideas spread via communication channels over time Such innovations are initially perceived as uncertain and even risky To overcome this uncertainty most people seek out others like themselves who have already adopted the new idea Thus the diffusion process consists of a few individuals who first adopt an innovation then spread the word among their circle of acquaintances a process which typically takes months or years But there are exceptions use of the Internet in the 1990s for example may have spread more rapidly than any other innovation in the history of humankind Furthermore the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people The fifth edition addresses the spread of the Internet and how it has transformed the way human beings communicate and adopt new ideas **The Theory of Innovation** Jon Sundbo, 1998 **The International Handbook on Innovation** Larisa V Shavinina, 2003-10-16 The breadth of this work will allow the reader to acquire a comprehensive and panoramic picture of the nature of innovation within a single handbook *Innovation and Entrepreneurship* Elias G.
