### **The Third Side Why We Fight And How We Can Stop:**

**The Third Side** William L. Ury, 2000-09-01 According to William Ury it takes two sides to fight but a third to stop. Distilling the lessons of two decades of experience in family struggles, labor strikes and wars, he presents a bold new strategy for stopping fights. He also describes ten practical roles as managers, teachers, parents and citizens that each of us can play every day to prevent destructive conflict. Fighting isn't an inevitable part of human nature. Ury explains, drawing on his training as an anthropologist and his work among primitive tribes and modern corporations. We have a powerful alternative: The Third Side, which can transform our daily battles into creative conflict and cooperation at home, at work and in the world.

**Why We Fight** David Churchman, 2013-05-09 This book draws on twenty-four academic disciplines to provide a critical analysis of some 100 theories that explain the origins, nature and management of human conflict. The book treats intellectual, individual, moral, interpersonal, organizational, community, political and international conflicts. It suggests six criteria for distinguishing good from bad theory and discusses how existing theories may be used and improved. *The Secrets of Gaining the Upper Hand in High Performance Negotiations* Manon Schonewille, Felix Merks, 2011 Although negotiations are an ever-present part of our everyday lives, many of us know little as to why we sometimes get our way while on other occasions we walk away feeling frustrated that we did not reach the desired agreement or we may have left too much value on the table. Knowing how to gain the upper hand to get what is necessary from a negotiation is particularly important when the stakes are high, especially in a situation where a negotiator feels the options and choices are limited yet something must be achieved. A negotiation can cause a lot of stress, making the stakes even higher and the negotiation dynamics more difficult to manage. New communication technologies play an increasingly important role in day-to-day negotiations. It is important to be aware of these situations in order to know what works and what does not work and how to maximize the outcome in such negotiation situations. The contributions in this book, as well as the exclusive interview with Chris Voss, an international business negotiator, capture the key concepts and the most important learning points on how to gain the upper hand in high-stake negotiations. The book deals in a concise way with proven tools such as recognizing escalation mechanisms and the techniques on how to de-escalate or deal with emotions. Readers will gain access to crucial insights from professionals like the FBI or US Army negotiators who are experienced in negotiating under extreme pressure in situations where lives are literally on the line. The book covers newer developments such as involving a deal facilitator and conducting negotiations. The book also includes an example of role-playing a negotiation in a conflict situation where the stakes are high and a lot of emotions are present on both sides of the table. **A Small Book of the Creation** William Mueller, PhD, 2017-09-16 This book critically examines biblical accounts of the origins of life and their implications for human obligation to God, nature and society as relevant today as they were thousands of years ago. It is argued to motivate actions that one would hope and pray are morally good and other regarding. Forward by Jeff Levin, PhD, MPH. [The Political Necessity of Transpersonal Work](#)
