Optical Coding Theory with Prime Wing C. Kwong, Guu-Chang Yang, 2018-09-03 Although several books cover the coding theory of wireless communications and the hardware technologies and coding techniques of optical CDMA no book has been specifically dedicated to optical coding theory until now Written by renowned authorities in the field Optical Coding Theory with Prime gathers together in one volume the fundamentals and developments of optical coding theory with a focus on families of prime codes supplemented with several families of non prime codes The book also explores potential applications to coding based optical systems and networks Learn How to Construct and Analyze Optical Codes The authors use a theorem proof approach breaking down theories into digestible form so that readers can understand the main message without searching through tedious proofs The

book begins with the mathematical tools needed to understand and apply optical coding theory from Galois fields and matrices to Gaussian and combinatorial analytical tools Using a wealth of examples the authors show how optical codes are constructed and analyzed and detail their performance in a variety of applications The book examines families of 1 D and 2 D asynchronous and synchronous multilength and 3 D prime codes and some non prime codes Get a Working Knowledge of Optical Coding Theory to Help You Design Optical Systems and Networks Prerequisites include a basic knowledge of linear algebra and coding theory as well as a foundation in probability and communications theory This book draws on the authors extensive research to offer an authoritative reference on the emerging field of optical coding theory In addition it supplies a working knowledge of the theory and optical codes to help readers in the design of coding based optical systems and networks For more on the technological aspects of optical CDMA see Optical Code Division Multiple Access Fundamentals and Applications CRC Press 2005

Influencing The Influencers: Applying Whaley's Communication And Deception Frameworks To Terrorism And Insurgent Narratives Tim Pappa,2025-06-20 This rare work is an unorthodox but informed approach to understanding and countering terrorism and insurgency narratives The author s candid ethnography of communication and organizational communication in progressive Islamic boarding schools in Indonesia is examined within the communication and deception frameworks of the late American information operations scholar Barton Whaley Nearly 20 years ago the author shadowed progressive Muslim influencers throughout Islamic boarding school or pesantren communities studying their communication practices This period was marked by repeated terrorist attacks claiming hundreds of lives throughout Indonesia and dangerous fugitives responsible for those attacks hiding throughout the country These fugitives grew up in Islamic boarding schools in some of the very communities and regions these case studies are based in Many were hiding near those schools while the author was there The narratives of the progressive Muslim influencers featured in these ethnographic case studies contrast the narratives of terrorism and insurgency that we might imagine or be familiar with today What is stark about these case studies are the largely conservative generational audiences in these Islamic boarding school communities that welcomed many of these progressive narratives even as more extremist narratives that we might characterize as terrorism and insurgency narratives were projected and shared in these same communities among these same audiences This work explores how and why those communities responded positively to those influencers The processes described in this ethnography of communication have not changed much other than the projection of those same narratives and communication online in greater content This book is useful for both researchers and practitioners in understanding and countering influence in the context of terrorism and insurgency narratives
