Anti-Submarine Warfare David Owen,2007-11-15 A deep dive into the tactics and technology used to defend against submarines from the opening of the First World War through World War II and beyond The submarine was undoubtedly the most potent purely naval weapon of the twentieth century In two world wars enemy underwater campaigns were very nearly successful in thwarting Allied hopes of victory indeed annihilation of Japanese shipping by US Navy submarines is an indicator of what might have been That the submarine was usually defeated is a hugely important story in naval history yet this is the first book to treat the subject as a whole in a readable and accessible manner It concerns individual heroism and devotion to duty but also ingenuity technical advances and originality of tactical thought What developed was an endless battle between forces above and below the surface where a successful innovation by one side eventually produces a countermeasure by the other in a lethal struggle for supremacy Development was not a straight line wrong ideas and assumptions led to defeat and disaster Iconography with dozens of photographs and often large format diagrams a vast bibliography and a complete and documented general approach make this volume a work of great quality and of great interest for all enthusiasts and scholars of this very interesting subject *Storia Militare* The modeller will not only find the text

engaging but there is a superb collection of photographs and illustrations which of course include submarines corvettes and destroyers Subjects which the modeller increasingly appreciates Highly recommended Model Boats *Apocalypse and Golden Age* Christopher Star,2021-12-07 How did the ancient Greeks and Romans envision the end of the world What is the long term future of the human race Will the world always remain as it is or will it undergo a catastrophic change What role do the gods human morality and the forces of nature play in bringing about the end of the world In *Apocalypse and Golden Age* Christopher Star reveals the answers that Greek and Roman authors gave to these questions The first large scale investigation of the various scenarios for the end of the world in classical texts this book demonstrates that key thinkers often viewed their world as shaped by catastrophe Star focuses on how this theme was explored over the centuries in the works of poets such as Hesiod Vergil Ovid and Lucan and by philosophers including the Presocratics Plato Epicurus Lucretius Cicero and Seneca With possibilities ranging from periodic terrestrial catastrophes to the total dissolution of the world these scenarios address the ultimate limits that define human life and institutions and place humanity in the long perspective of cosmic and natural history These texts also explore various options for the rebirth of society after world catastrophe such as a return of the Golden Age or the redevelopment of culture and political institutions Greek and Roman visions of the end Star argues are not calls to renounce this world and prepare for a future kingdom Rather they are set within larger investigations that examine and seek to improve personal and political life in the present Contextualizing classical thought about the apocalypse with biblical studies Star shows that the seeds of our contemporary anxieties about globalization politics and technology were sown during the Roman period Even the prevalent link between an earthly leader and the beginning of the end times can be traced back to Greek and Roman rulers the emperor Nero in particular *Apocalypse and Golden Age* enriches our understanding of apocalyptic thought
