Global History, Globally Sven Beckert, Dominic Sachsenmaier, 2018 In recent years historians in many different parts of the world have sought to transnationalize and globalize their perspectives on the past Despite all these efforts to gain new global historical visions however the debates surrounding this movement have remained rather provincial in scope *Global History Globally* addresses this lacuna by surveying the state of global history in different world regions Divided into three distinct but tightly interweaved sections the book's chapters provide regional surveys of the practice of global history on all continents review some of the research in four core fields of global history and consider a number of problems that global historians have contended with in their work The authors hail from various world regions and are themselves leading global historians Collectively they provide an unprecedented survey of what today is the most dynamic field in the discipline of history As one of the first books to systematically discuss the international dimensions of global historical scholarship and address a wealth of questions emanating from them *Global History Globally* is a must read book for all students and scholars of global history Bloomsbury Publishing

What Is Global History? Sebastian Conrad, 2016-01-12 The first comprehensive overview of the innovative new discipline of global history Until very recently historians have looked at the past with the tools of the nineteenth century But globalization has fundamentally altered our ways of knowing and it is no longer possible to study nations in isolation or to understand world history as emanating from the West This book reveals why the discipline of global history has emerged as the most dynamic and innovative field in history one that takes the connectedness of the world as its point of departure and that poses a fundamental challenge to the premises and methods of history as we know it *What Is Global History* provides a comprehensive overview of this exciting new approach to history The book addresses some of the biggest questions the discipline will face in the twenty first century How does global history differ from other interpretations of world history How do we write a global history that is not Eurocentric yet does not fall into the trap of creating new centrism How can historians compare different societies and establish compatibility across space What are the politics of global history This in

depth and accessible book also explores the limits of the new paradigm and even its dangers the question of whom global history should be written for and much more Written by a leading expert in the field What Is Global History shows how by understanding the world's past as an integrated whole historians can remap the terrain of their discipline for our globalized present

Competing Visions of World Order Sebastian Conrad, Dominic Sachsenmaier, 2007-06-08 Bringing together scholars from around the world this first book in the Palgrave Macmillan Transnational History Series raises the question of how we can get away from the contemporary language of globalization so as to identify meaningful global ways of defining historical events and processes in the late Nineteenth and Twentieth centuries

Conceptualizing Global History Bruce Mazlish, Ralph Buultjens, 1993-09-19 As we enter a truly global epoch we need a historical awareness to match the times This book offers a new scholarly perspective a new historical consciousness and a new sub field of history global history that will have a major impact on the way we write history and make policy in the future The need for a new approach can be seen everywhere in environmental problems that ignore national boundaries in nuclear threats that have no territorial limitations in the rapid increase in multi national economic activity and in advances in space exploration and communication satellites that link peoples to a degree hitherto unimagined The contributors to this book offer both a theoretical treatment and a number of examples of what global history is and how it might be written It is recognized that global history is not the only history that can or should be written and that globalism is often matched by increased localism thus requiring a keen sense of the dialectic involved New actors need to be identified and studied on the historical stage other than the nation state Though global history is a form of contemporary history starting from our present moment it must look backward with the range depending on the problem Thus global history seeks to be methodologically sophisticated while pioneering a new way of thinking about history in the coming millennium

Global Intellectual History Samuel Moyn, Andrew Sartori, 2013-06-25 Where do ideas fit into historical accounts that take an expansive global view of human movements and events Teaching scholars of intellectual history to incorporate transnational perspectives into their work while also recommending how to confront the challenges and

controversies that may arise this original resource explains the concepts concerns practice and promise of global intellectual history featuring essays by leading scholars on various approaches that are taking shape across the discipline The contributors to Global Intellectual History explore the different ways in which one can think about the production dissemination and circulation of global ideas and ask whether global intellectual history can indeed produce legitimate narratives They discuss how intellectuals and ideas fit within current conceptions of global frames and processes of globalization and proto globalization and they distinguish between ideas of the global and those of the transnational identifying what each contributes to intellectual history A crucial guide this collection sets conceptual coordinates for readers eager to map an emerging area of study
