Fisheries and Aquaculture Gustavo Lovrich, Martin Thiel, 2020-07-08 This is the ninth volume of ten in the The Natural History of the

Crustacea Series The chapters in this volume synthesize the diverse topics in fisheries and aquaculture In the first part of the book chapters explore worldwide crustacean fisheries This section comes to a conclusion with two chapters on harvested crustaceans that are usually not within the focus of the mainstream fisheries research possibly because they are caught by local fishing communities in small scale operations and sold locally as subsistence activity In the second part of the book the authors explore the variety of cultured crustacean species like shrimps prawns lobsters and crabs Chapters in the third part of the volume focus on important challenges and opportunities including diseases and parasitism the use of crustacean as bioindicators and their role in biotechnology
