Visual Aspects Of Dyslexia:

Visual Aspects of Dyslexia John Stein,Zoï Kapoula,2012-08-23 Although the dominant view of dyslexia is that it is caused by linguistic phonological weakness recent research within neuroscience has shown that it is associated with visual processing problems as well This book brings together research from neurology neuroscience and the vision sciences to present a cutting edge review of this topic Vision and Visual Dyslexia John Frederick Stein,1991 **Dyslexia** Carlo Aleci,2013 Even if the ophthalmological aspects of developmental dyslexia are generally considered negligible in comparison to the cognitive and phonological ones a growing body of evidence suggests in many patients the presence of deficiencies related to a neuronal sub population along the visual pathway Still even in the limited area of neuro opthalmological research there is no general agreement on the mechanisms underlying reading impairment and on how the aetiological element determines the phenotype that is to say the typical symptomatology Nevertheless the spatial and temporal vision in dyslexics seem to be defective The purpose of this work is to report in a critical way the state of the art visual research in developmental dyslexia without considering the aspects that go beyond our competence In the second part of the treatise the personal approach to the visuoperceptive impairment in this clinical condition is phenomenological rather than aetiological it investigates the problem from the perceptive symptoms and signs rather than from the causal hypothesis and from the anatomofunctional demonstration Without claiming to exhaust the subject we have pursued a triple aim trying to shed light on one of the most debated and controversial questions providing a rigorous and comprehensive overview on the current acquisitions and why not offering some cues to those who intend to contribute to solve this problem **The Dyslexia Debate** Julian G. Elliott,Elena L. Grigorenko,2014-03-24 An examination of how we use the term dyslexia and how this may undermine aid for struggling readers **Cognitive and Brain Plasticity Induced by Physical Exercise, Cognitive Training, Video Games and Combined Interventions** Soledad Ballesteros,Claudia Voelcker-Rehage,Louis Bherer,2018-07-05 The premise of neuroplasticity on enhancing cognitive functioning among healthy as well as cognitively impaired individuals across the lifespan and the potential of harnessing these processes to prevent cognitive decline attract substantial scientific and public interest Indeed the systematic evidence base for cognitive training video games physical exercise and other forms of brain stimulation such as entrain brain activity is growing rapidly This Research Topic RT focused on recent research conducted in the field of cognitive and brain plasticity induced by physical activity different types of cognitive training including computerized interventions learning therapy video games and combined intervention approaches as well as other forms of brain stimulation that target brain activity including electroencephalography and neurofeedback It contains 49 contributions to the topic including Original Research articles 37 Clinical Trials 2 Reviews 5 Mini Reviews 2 Hypothesis and Theory 1 and Corrections 2 **Fluency and Reading Comprehension in Typical Readers and Dyslexic Readers: Volume II** Manuel Soriano-Ferrer,Simone Aparecida Capellini,Giseli Donadon Germano,2024-03-06

This Research Topic is the second edition of Fluency and reading comprehension in typical readers and dyslexics readers Volume I This Second Edition Research Topic is focused on the characterization of the reading writing difficulties and their comorbidities and in the analysis of evidence based recommendations for early interventions and treatment of these difficulties within the fields of neuropsychology speech language pathology and educational psychology Reading involves decoding and comprehension components and to become efficient it requires a large number of cognitive and linguistic processes Among those decoding failures can have different origins such as deficits in phonological and or visual processing In addition a child with reading difficulties might also have problems in the acquisition of writing and handwriting performance This is an important point to be discussed as reading and writing both suffer interference from vocabulary acquisition linguistic skills memory skills reading and writing practices and literacy methods These processes become important only when the professional needs to deal with students presenting learning difficulties Difficulty in using the knowledge of conversion rules between grapheme phoneme to word reading construction or phoneme grapheme for writing can be identified in schoolchildren with dyslexia dysgraphia and dysortography being a specific learning disorder with a neurological etiology In addition there is established evidence of a speech language processing basis students with specific learning disabilities can show a range of cognitive difficulties e g rapid naming executive functioning working memory These presented difficulties interfere in their learning process impairing their learning development
