Visual Insights A Practical Guide To Making Sense Of Data:

Visual Insights Katy Börner, David E. Polley, 2014-01-24 A guide to the basics of information visualization that teaches nonprogrammers how to use advanced data mining and visualization techniques to design insightful visualizations In the age of Big Data the tools of information visualization offer us a macroscope to help us make sense of the avalanche of data available on every subject This book offers a gentle introduction to the design of insightful information visualizations It is the only book on the subject that teaches nonprogrammers how to use open code and open data to design insightful visualizations Readers will learn to apply advanced data mining and visualization techniques to make sense of temporal geospatial topical and network data The book developed for use in an information visualization MOOC covers data analysis algorithms that enable extraction of patterns and trends in data with chapters devoted to when temporal data where geospatial data what topical data and with whom networks and trees and to systems that drive research and development Examples of projects undertaken for clients include an interactive visualization of the success of game player activity in World of Warcraft a visualization of 311 number adoption that shows the diffusion of non emergency calls in the United States a return on investment study for two decades of HIV AIDS research funding by NIAID and a map showing the impact of the HiveNYC Learning Network *Visual Insights* will be an essential resource on basic information visualization techniques for scholars in many fields students designers or anyone who works with data [Data Conscience](#) Brandeis Hill Marshall, 2022-08-19 DATA CONSCIENCE ALGORITHMIC SIEGE ON OUR HUM4N1TY EXPLORE HOW D4TA STRUCTURES C4N HELP OR H1NDER SOC1AL EQU1TY Data has enjoyed bystander status as we've attempted to digitize responsibility and morality in tech In fact data's importance should earn it a spot at the center of our thinking and strategy around building a better more ethical world It's use and misuse lies at the heart of many of the racist gendered classist and otherwise oppressive practices of modern tech In *Data Conscience Algorithmic Siege on our Humanity* computer science and data inclusivity thought leader Dr Brandeis Hill Marshall delivers a call to action for rebel tech leaders who acknowledge and are prepared to address the current limitations of software development In the book Dr Brandeis Hill Marshall discusses how the philosophy of move fast and break things is itself broken and requires change You'll learn about the ways that discrimination rears its ugly head in the digital data space and how to address them with several known algorithms including social network analysis and linear regression A can't miss resource for junior level to senior level software developers who have gotten their hands dirty with at least a handful of significant software development projects *Data Conscience* also provides readers with Discussions of the importance of transparency Explorations of computational thinking in practice Strategies for encouraging accountability in tech Ways to avoid double edged data visualization Schemes for governing data structures with law and algorithms **Atlas of Knowledge** Katy Börner, 2015-03-20 The power of mapping principles for visualizing knowledge illustrated by many stunning large scale full color maps Maps of physical spaces locate us in the world

and help us navigate unfamiliar routes Maps of topical spaces help us visualize the extent and structure of our collective knowledge they reveal bursts of activity pathways of ideas and borders that beg to be crossed This book from the author of Atlas of Science describes the power of topical maps providing readers with principles for visualizing knowledge and offering as examples forty large scale and more than 100 small scale full color maps Today data literacy is becoming as important as language literacy Well designed visualizations can rescue us from a sea of data helping us to make sense of information connect ideas and make better decisions in real time In Atlas of Knowledge leading visualization expert Katy Brner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis Drawing on fifteen years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the Atlas features striking and enlightening new maps from the popular Places Spaces Mapping Science exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science

Data-Driven Design and Construction Randy Deutsch, 2015-08-27 In this comprehensive book Professor Randy Deutsch has unlocked and laid bare the twenty first century codice nascosto of architecture It is data Big data Data as driver This book offers us the chance to become informed and knowledgeable pursuers of data and the opportunities it offers to making architecture a wonderful useful and smart art form From the Foreword by James Timberlake FAIA Written for architects engineers contractors owners and educators and based on today's technology and practices Data Driven Design and Construction 25 Strategies for Capturing Applying and Analyzing Building Data addresses how innovative individuals and firms are using data to remain competitive while advancing their practices seeks to address and rectify a gap in our learning by explaining to architects engineers contractors and owners and students of these fields how to acquire and use data to make more informed decisions documents how data driven design is the new frontier of the convergence between BIM and architectural computational analyses and associated tools is a book of adaptable strategies you and your organization can apply today to make the most of the data you have at your fingertips Data Driven Design and Construction was written to help design practitioners and their project teams make better use of BIM and leverage data throughout the building lifecycle

Making Data Visual Danyel Fisher, Miriah Meyer, 2017-12-20 You have a mound of data front of you and a suite of computation tools at your disposal Which parts of the data actually matter Where is the insight hiding If you're a data scientist trying to navigate the murky space between data and insight this practical book shows you how to make sense of your data through high level questions well defined data analysis tasks and visualizations to clarify understanding and gain insights along the way When incorporated into the process early and often iterative visualization can help you refine the questions you ask of your data Authors Danyel Fisher and Miriah Meyer provide detailed case studies that demonstrate how this process can evolve in the real world You'll learn The data counseling process for moving from general to more precise questions about your data and arriving at a working visualization The role that visual representations play in data discovery Common visualization types by the tasks they fulfill and the data they use Visualization techniques that use multiple views and interaction to support analysis of large complex data sets

Making Sense of Data III Glenn J. Myatt, Wayne P. Johnson, 2011-09-09 Focuses on insights approaches and techniques that are essential to designing interactive graphics and visualizations *Making Sense of Data III A Practical Guide to Designing Interactive Data Visualizations* explores a diverse range of disciplines to explain how meaning from graphical representations is extracted Additionally the book describes the best approach for designing and implementing interactive graphics and visualizations that play a central role in data exploration and decision support systems Beginning with an introduction to visual perception *Making Sense of Data III* features a brief history on the use of visualization in data exploration and an outline of the design process Subsequent chapters explore the following key areas Cognitive and Visual Systems describes how various drawings maps and diagrams known as external representations are understood and used to extend the mind's capabilities Graphics Representations introduces semiotic theory and discusses the seminal work of cartographer Jacques Bertin and the grammar of graphics as developed by Leland Wilkinson Designing Visual Interactions discusses the four stages of design process analysis design prototyping and evaluation and covers the important principles and strategies for designing visual interfaces information visualizations and data graphics Hands on Creative Interactive Visualizations with Protovis provides an in depth explanation of the capabilities of the Protovis toolkit and leads readers through the creation of a series of visualizations and graphics The final chapter includes step by step examples that illustrate the implementation of the discussed methods and a series of exercises are provided to assist in learning the Protovis language A related website features the source code for the presented software as well as examples and solutions for select exercises Featuring research in psychology vision science statistics and interaction design *Making Sense of Data III* is an indispensable book for courses on data analysis and data mining at the upper undergraduate and graduate levels The book also serves as a valuable reference for computational statisticians software engineers researchers and professionals of any discipline who would like to understand how the mind
