Visual Perception An Introduction 3rd Edition:

Visual Perception Nicholas Wade, Mike Swanston, 2013-03-05 Does the world appear the same to everyone Does what we know determine what we see Why do we see the world as we do Vision is our most dominant sense From the light that enters our eyes to the complex cognitive processes that follow we derive most of our information about what things are where they are and how they move from our vision Visual Perception takes a refreshingly different approach to this enigmatic sense From the function that vision serves for an active observer to the history of visual perception itself the third edition has been extensively revised updated and expanded while still preserving the essential features of historical context neurophysiology and independent thought that made the earlier editions so engaging Covering the perception of location motion object recognition and with up to date information on the workings of the visual brain the 3rd edition looks at how our ideas have been shaped not just by psychology but by art optics biology and philosophy The emphasis on understanding vision as a basis for action in the real world has also been expanded to cover seeing representations of all sorts whether they are pictures or computer generated displays The 3rd Edition of Visual Perception is a readable accessible and truly relevant introduction to the world of perception and will be welcomed by students of visual perception as well as anyone with a general interest in the mysteries and wonder of vision

Visual Perception Nicholas J. Wade, Michael Swanston, 2013 Vision is our most dominant sense From the light that enters our eyes to the complex cognitive processes that follow we derive most of our information about what things are where they are and how they move from our vision

Visual Perception Michael T. Swanston, Nicholas J. Wade, 2013-02-01 Vision is our most dominant sense from which we derive most of our information about the world From the light that enters the eye and the processing in the brain that follows we can sense where things are how they move and what they are The first edition of Visual Perception took a refreshingly different approach to perception starting from the function that vision serves for an active observer in a three dimensional environment This fully revised and expanded new edition continues this approach in contrast to the traditional textbook treatment of vision as a catalogue of phenomena Following a general introduction to the main theoretical approaches the authors discuss the historical basis of our current knowledge Placing the study of vision in its historical context they look at how our ideas have been shaped by art optics biology and philosophy as well as psychology Visual optics and the neurophysiology of vision are also described The core of the book covers the perception of location motion and object recognition There is a new chapter on representation and vision including a section on the perception of computer generated images This readable accessible and truly relevant introduction to the world of perception aims to elicit both independent thought and further study It will be welcomed by students of visual perception and those with a general interest in the mysteries of vision

Visual Perception Nicholas J. Wade, 2003 Vision is our most dominant sense from which we derive most of our information about the world From the light that enters the eye and the processing in the brain that follows we

can sense where things are how they move and what they are The first edition of Visual Perception took a refreshingly different approach to perception starting from the function that vision serves for an active observer in a three dimensional environment In this second edition Nicholas Wade and Michael Swanston have continued this approach in contrast to many traditional textbook treatments of vision as a catalog of facts
