Visualizing Atrocity Arendt Evil And The Optics Of Thoughtlessness Critical Cultural Communication:

Visualizing Atrocity Valerie Hartouni, 2012-08-20 Taking Hannah Arendt's account of the 1961 trial of Nazi official Adolf Eichmann as its point of departure this book reassesses the myths that shape our understanding of the Nazi genocide as well as totalitarianism's broader features. These myths are tied to the atrocity imagery that emerged with the liberation of the concentration camps and played an evidentiary role in the post-war trials of perpetrators. At the 1945 Nuremberg Tribunal particular practices of looking were first established and later institutionalized through Eichmann's trial in Jerusalem as part of the fabric of historical fact. These ways of seeing have come to constitute a visual rhetoric that drives contemporary mythmaking about how we know genocide and what is permitted to count as such. In contrast Arendt's claims about the banality of evil work to disrupt this visual rhetoric.

The Post-Racial Mystique Catherine Squires, 2014-04-04 Despite claims from pundits and politicians that we now live in a post-racial America people seem to keep finding ways to talk about race. From celebrations of the inauguration of the first Black president to resurgent debates about police profiling race and racism remain salient features of our world. When faced with fervent anti-immigration sentiments record incarceration rates of Blacks and Latinos and deepening socio-economic disparities a new question has erupted in the last decade: What does being post-racial mean? *The Post-Racial Mystique* explores how a variety of media—the news network television and online independent media—debate, define, and deploy the term post-racial in their representations of American politics and society. Using examples from both mainstream and niche media from prime-time television series to specialty Christian media and audience interactions on social media Catherine Squires draws upon a variety of disciplines including communication studies sociology political science and cultural studies in order to understand emergent strategies for framing post-racial America. She reveals the ways in which media texts cast U.S. history re-imagine interpersonal relationships employ statistics and inventively redeploy other identity categories in a quest to formulate different ways of responding to race.

Sounds of Belonging Dolores Ines Casillas, 2014-10-17 How Spanish language radio has influenced American and Latino discourse on key current affairs issues such as citizenship and immigration. Winner Book of the Year presented by the American Association of Hispanics in Higher Education Honorable Mention for the 2015 Latino Studies Best Book presented by the Latin American Studies Association. The last two decades have produced continued Latino population growth and marked shifts in both communications and immigration policy. Since the 1990s Spanish language radio has dethroned English language radio stations in major cities across the United States taking over the number one spot in Los Angeles Houston Miami and New York City. Investigating the cultural and political history of U.S. Spanish language broadcasts throughout the twentieth century *Sounds of Belonging* reveals how these changes have helped Spanish language radio secure its dominance in the major U.S. radio markets. Bringing together theories on the immigration experience with sound and radio studies Dolores Ines Casillas documents how Latinos form listening relationships with Spanish language radio programming. Using a

vast array of sources from print culture and industry journals to sound archives of radio programming she reflects on institutional growth the evolution of programming genres and reception by the radio industry and listeners to map the trajectory of Spanish language radio from its grassroots origins to the current corporate sponsored business it has become Casillas focuses on Latinos use of Spanish language radio to help navigate their immigrant experiences with U S institutions for example in broadcasting discussions about immigration policies while providing anonymity for a legally vulnerable listenership Sounds of Belonging proposes that debates of citizenship are not always formal personal appeals but a collective experience heard loudly through broadcast radio

Authentic™ Sarah Banet-Weiser, 2012-11-26 A stimulating smart book on what it means to live in a brand culture Brands are everywhere Branding is central to political campaigns and political protest movements the alchemy of social media and self branding creates overnight celebrities the self proclaimed greening of institutions and merchant goods is nearly universal But while the practice of branding is typically understood as a tool of marketing a method of attaching social meaning to a commodity as a way to make it more personally resonant with consumers Sarah Banet Weiser argues that in the contemporary era brands are about culture as much as they are about economics That in fact we live in a brand culture Authentic™ maintains that branding has extended beyond a business model to become both reliant on and reflective of our most basic social and cultural relations Further these types of brand relationships have become cultural contexts for everyday living individual identity and personal relationships what Banet Weiser refers to as brand cultures Distinct brand cultures that at times overlap and compete with each other are taken up in each chapter the normalization of a feminized self brand in social media the brand culture of street art in urban spaces religious brand cultures such as New Age Spirituality and Prosperity Christianity and the culture of green branding and shopping for change In a culture where graffiti artists loan their visions to both subway walls and department stores buying a cup of fair trade coffee is a political statement and religion is mass marketed on t shirts Banet Weiser questions the distinction between what we understand as the authentic and branding practices But brand cultures are also contradictory and potentially rife with unexpected possibilities leading Authentic™ to articulate a politics of ambivalence creating a lens through which we can see potential political possibilities within the new consumerism

Making Media Work Derek Johnson, Derek Kompare, Avi Santo, 2014-08 The management and labor culture of the entertainment industry In popular culture management in the media industry is frequently understood as the work of network executives studio developers and market researchers the suits who oppose the more productive forces of creative talent and subject that labor to the inefficiencies and risk aversion of bureaucratic hierarchies However such portrayals belie the reality of how media management operates as a culture of shifting discourses dispositions and tactics that create meaning generate value and shape media work throughout each moment of production and consumption Making Media Work aims to provide a deeper and more nuanced understanding of management within the entertainment industries Drawing from work in critical

sociology and cultural studies the collection theorizes management as a pervasive yet flexible set of principles drawn upon by a wide range of practitioners artists talent scouts performers directors show runners and more in their ongoing efforts to articulate relationships and bridge potentially discordant forces within the media industries The contributors interrogate managerial labor and identity shine a light on how management understands its roles within cultural and creative contexts and reconfigure the complex relationship between labor and managerial authority as productive rather than solely prohibitive Engaging with primary evidence gathered through interviews archives and trade materials the essays offer tremendous insight into how management is understood and performed within media industry contexts The volume as a whole traces the changing roles of management both historically and in the contemporary moment within US and international contexts and across a range of media forms from film and television to video games and social media

Power, Judgment and Political Evil Danielle Celermajer, 2016-04-08 In an interview with G nther Gaus for German television in 1964 Hannah Arendt insisted that she was not a philosopher but a political theorist Disillusioned by the cooperation of German intellectuals with the Nazis she said farewell to philosophy when she fled the country This book examines Arendt s ideas about thinking acting and political responsibility investigating the relationship between the life of the mind and the life of action that preoccupied Arendt throughout her life By joining in the conversation between Arendt and Gaus each contributor probes her ideas about thinking and judging and their relation to responsibility power and violence An insightful and intelligent treatment of the work of Hannah Arendt this volume will appeal to a wide number of fields beyond political theory and philosophy including law literary studies social anthropology and cultural history A Study in Thoughtlessness Florian Miedel, 1989 *Hannah Arendt, Politics, Conscience, Evil* George Kateb, 1984
