Wired Tv Laboring Over An Interactive Future:

Wired TV Denise Mann, 2014-02-11 This collection looks at the post network television industry's heady experiments with new forms of interactive storytelling or wired TV that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular participatory Web 2.0 companies like Facebook YouTube and Twitter Contributors address a wide range of issues from the networks sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational corporate conglomeration on entrepreneurial creativity With essays from such top scholars as Henry Jenkins John T Caldwell and Jonathan Gray and from new and exciting voices emerging in this field *Wired TV* elucidates the myriad new digital threats and the equal number of digital opportunities that have become part and parcel of today's post network era Readers will quickly recognize the familiar television franchises on which the contributors focus including *Lost* *The Office* *Entourage* *Battlestar Gallactica* *The L Word* and *Heroes* in order to reveal their impact on an industry in transition While it is not easy for vast bureaucracies to change course executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities by incorporating social media members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era members of the Madison Avenue advertising community who were eager to rethink ad supported content and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series In the aftermath of the lengthy Writers Guild of America strike of 2007-2008 the networks clamped down on such collaborations and began to reclaim control over their operations locking themselves back into an aging system of interconnected bureaucracies entrenched hierarchies and traditional partners from the past What's next for the future of the television industry Stay tuned or at least online Contributors Vincent Brook Will Brooker John T Caldwell M J Clarke Jonathan Gray Henry Jenkins Derek Johnson Robert V Kozinets Denise Mann Katynka Z Mart nez and Julie Levin Russo *Social TV* Cory Barker, 2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment Media Industries On March 15 2011 Donald Trump changed television forever The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real time reactions on Twitter generating more than 25 000 tweets and making the broadcast the most watched Roast in Comedy Central history The *trumproast* initiative personified the media and tech industries utopian vision for a multi screen and communal live TV experience In *Social TV* Multi Screen Content and Ephemeral Culture author Cory Barker reveals how the US television industry promised but failed to deliver a social media revolution in the 2010s to combat the imminent threat of on demand streaming video Barker examines the rise and fall of Social TV across press coverage corporate documents and an

array of digital ephemera He demonstrates that despite the talk of disruption the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy Case studies from broadcast networks to tech start ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period To trace these unfulfilled promises and flopped ideas Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing Yet in placing this now forgotten material in recent historical context Social TV shows how the era altered how the industry pursues audiences Multi screen campaigns have shifted away from a focus on live TV and toward all day content streams The legacy of Social TV then is the further embedding of media and promotional material onto every screen and into every moment of life

Transmedia Storytelling and the Apocalypse Stephen Joyce, 2018-08-21 This book confronts the question of why our culture is so fascinated by the apocalypse It ultimately argues that while many see the post apocalyptic genre as reflective of contemporary fears it has actually co evolved with the transformations in our mediascape to become a perfect vehicle for transmedia storytelling The post apocalyptic offers audiences a portal to a fantasy world that is at once strange and familiar offers a high degree of internal consistency and completeness and allows for a diversity of stories by different creative teams in the same story world With case studies of franchises such as *The Walking Dead* and *The Terminator* **Transmedia Storytelling and the Apocalypse** offers analyses of how shifts in media industries and reception cultures have promoted a new kind of open world building narrative across film television video games and print For transmedia scholars and fans of the genre this book shows how the end of the world is really just the beginning

Old Futures Alexis Lothian,2018-09-25 Finalist 2019 Locus Award for Nonfiction presented by the Locus Science Fiction Foundation Traverses the history of imagined futures from the 1890s to the 2010s interweaving speculative visions of gender race and sexuality from literature film and digital media Old Futures explores the social political and cultural forces feminists queer people and people of color invoke when they dream up alternative futures as a way to imagine transforming the present Lothian shows how queer possibilities emerge when we practice the art of speculation of imagining things otherwise than they are and creating stories from that impulse Queer theory offers creative ways to think about time breaking with straight and narrow paths toward the future laid out for the reproductive family the law abiding citizen and the believer in markets Yet so far it has rarely considered the possibility that instead of a queer present reshaping the ways we relate to past and future the futures imagined in the past can lead us to queer the present Narratives of possible futures provide frameworks through which we understand our present but the discourse of the future has never been a singular one Imagined futures have often been central to the creation and maintenance of imperial domination and technological modernity Old Futures offers a counterhistory of works

that have sought with varying degrees of success to speculate otherwise Examining speculative texts from the 1890s to the 2010s from Samuel R Delany to Sense8 Lothian considers the ways in which early feminist utopias and dystopias Afrofuturist fiction and queer science fiction media have insisted that the future can and must deviate from dominant narratives of global annihilation or highly restrictive hopes for redemption Each chapter chronicles some of the means by which the production and destruction of futures both real and imagined takes place through eugenics utopia empire fascism dystopia race capitalism femininity masculinity and many kinds of queerness reproduction and sex Gathering stories of and by populations who have been marked as futureless or left out by dominant imaginaries Lothian offers new insights into what we can learn from efforts to imaginatively redistribute the future
