G.L. Cleintuar, *Wisselend getij. Geschiedenis van de Zuiderzeevereeniging 1886-1949* (Publicaties van de Stichting voor het Bevolkingsonderzoek in de drooggelegde Zuiderzeepolders; Zutphen: De Walburg Pers, 1982, 464 blz., f75,—, ISBN9060111184).

Vijftig jaar na de voltooiing van de Afsluitdijk verscheen deze lijvige en grondige studie, gebaseerd op het archief van de vereniging, dat na haar liquidatie in het bezit kwam van de stichting, die thans dit boek heeft laten uitgeven. Hoewel de geschiedenis van de afsluiting en drooglegging van de Zuiderzee natuurlijk voortdurend in het boek ter sprake komt, is dit toch in de eerste plaats bedoeld als de geschiedenis van de vereniging van binnen uit, waarbij volgens een bepaald model steeds per periode dezelfde vragen worden beantwoord ten aanzien van werkwijze en functioneren. Deze aanpak brengt wel een zekere structuur in de massa van feiten, rapporten en discussies, maar heeft het nadeel - zoals de schrijver zelf ook opmerkt -, dat bepaalde zaken bijvoorbeeld zowel bij de financiële ontwikkeling en de bestuursgeschiedenis als bij de middelen van beïnvloeding der buitenwereld aan de orde komen en herhalingen onvermijdelijk werden.

De op 4 januari 1886 opgerichte Zuiderzeevereeniging bestond aanvankelijk vooral uit liberalen; het Eerste-Kamerlid A. Buma uit Hindeloopen en zijn collega uit de Tweede Kamer P.J.G. van Diggelen uit Zwolle waren de drijvende krachten in de eerste jaren. De vereniging was een typische pressure group, die de publieke opinie trachtte te beïnvloeden door middel van brochures, lezingen en polemieken. Het aantal leden heeft op zijn hoogst de vijfhonderd nauwelijks overschreden, maar daaronder waren wel veel invloedrijke en aanzienlijke personen: bestuurders, zakenmensen en technici van naam. In de kringen van bestuur en commissies heerste een soort van Zuiderzee-pragmatisme en een overtuiging dat, wat goed was voor de Zuiderzeelannen, ook goed was voor het hele land.

De meest vruchtbare periode voor de vereniging werd gevormd door de jaren 1886-1894, waarin veel baanbrekend werk is verricht door het technisch bureau, dat - hoofdzakelijk onder leiding van ir. C. Lely - zich bezig hield met een letterlijk en figuurlijk diepgaand onderzoek naar de wenselijkheid en uitvoerbaarheid van de afsluiting van de Zuiderzee, het Waddengebied en de Lauwerszee. Uit het toen verrichte grondonderzoek bleek pas, welke dikke lagen vruchtbare klei de zeebodem in de latere Noordoostpolder rijk was en waar de beste ondergrond lag voor de toekomstige Afsluitdijk. Aangezien de vereniging het hele onderzoek zonder enige subsidie zelf moest betalen, was haar financiële positie voortdurend zorgelijk, zodat zelfs Lely op een penibel moment zijn salarisverhoging in de waarborgkas stortte om een gat te stoppen.

Toen de ingenieur van de vereniging in 1891 minister van waterstaat, handel en nijverheid werd, leken de perspectieven voor haar doelstellingen uitzonderlijk gunstig. Lely nam zelf het voorzitterschap van een staatscommissie op zich, welke na anderhalf jaar studie tot de conclusie kwam, dat afsluiting en droogmaking van de Zuiderzee in 'slands belang behoorden te worden ondernomen. Helaas was intussen het kabinet demissionair geworden en tijdens zijn volgende ministerperiode (1897-1901) kwam Lely - vooral geoccupeerd door de sociale wetgeving - pas op het eind met een ontwerp-Zuiderzeewet, dat door de liberale verkiezingsnederlaag niet meer in behandeling kwam en door zijn opvolger werd ingetrokken. In 1913 stelde hij als voorwaarde voor zijn toetreden tot het ministerie-Cort

Wisselend Getij Geschiedenis Van De Zuiderzee Vereniging 18861949:

Oganisation Institutionnelle de la Gestion de L'eau Aux XIXe Et XXe Siecles J. C. N. Raadschelders, 2005 Water management has become a major issue for public policies at any latitude How and why this happened could not be assessed efficiently without developing a longitudinal and comparative analysis such as the one in this book Institutional arrangements for the provision and the use of water are peculiarly persistent as well as remarkably resilient This makes them an ideal subject of an historical account Not that history is worth writing about only when it treats immutable phenomena On the contrary its main purpose is to record changes and possibly explain them But long lasting continuity urges the scholar to venture into the remote past since only there are to be discovered the initial causes and the deeper meanings of the institutions under scrutiny Also continuity makes the strength of path dependency all the more evident and consequently underlines the weight of history

From Flood Safety to Spatial Management Emmy Bergsma, 2018-07-25 This book deals with the introduction of a new type of spatial measures in flood governance In contrast to traditional safety measures that aim to provide protection against floods by building structural flood defenses such as levees and flood walls the goal of spatial measures is to reduce the exposure to flood risks by changing the spatial layout of flood prone areas By limiting developments and flood proofing buildings in areas at risk to flooding investments in structural flood defenses can be circumvented and vulnerabilities reduce World wide spatial measures are gaining attractiveness as a response strategy to increasing flood risks caused by climate change and urbanization The introduction of spatial measures in flood governance involves more than the simple development of new policies and laws Research has demonstrated that the implementation of spatial measures can have huge implications for how costs and responsibilities are divided between different levels of governance and between public and private actors changing the whole organization behind flood governance Both for the effectiveness and for the legitimacy of spatial flood governance strategies it is important that these distributive implications are well understood This book describes the introduction of spatial measures in the context of two very different delta countries the Netherlands and the United States In the United States a spatial flood governance strategy was already developed in de mid 20th century whereas in the Netherlands a safety paradigm institutionalized over the course of the 20th century and spatial measures have only recently been introduced By analyzing the science policy interactions underlying the implementation of spatial measures in both countries this book shows how under the influence of different types of experts engineers in the Netherlands and social geographers in the United States different spatial flood management strategies emerged with different distributive implications each with its own challenges for effectiveness and legitimacy

Nederlands landschap veranderde zo drastisch als het IJsselmeergebied. De zee werd afgesloten, zout werd zoet, eilanden verdwenen en een provincie ontstond. In 1873 maakte de Fransman Henry Havard een iconische reis rondom de Zuiderzee. Hij wilde de pittoreske dorpen en steden vastleggen voordat de modernisering ze voorgoed zou veranderen. Honderdvijftig jaar later vaart Ronald Nijboer in zijn kielzog het IJsselmeer rond. Met een historische tjalk bezoekt hij de oude en nieuwe kustplaatsen waar hij de verhalen van de bewoners optekent. Wat is veranderd en wat is gebleven? Hoe zijn we omgegaan met ons landschap en onze cultuur? En wat leert het verleden ons over de toekomst? Nijboers moderne ontdekkingsreis leest als een ode aan de IJsselmeerregio als n gebied met een gedeelde geschiedenis, identiteit en cultuur.

NRC Met veel geestdrift vaart Ronald Nijboer in het boeiende Wereldzee in de polder, een 19de eeuwse Fransman achterna over de voormalige Zuiderzee. *de Volkskrant* Geografisch tijdschrift Koninklijk Nederlands Aardrijkskundig Genootschap, 1989 **Goud, geld en water** Gerard Vissering, 2024-12-05 Gerard Vissering 1865-1937 was zonder twijfel de interessantste president van De Nederlandsche Bank, wiens ambtsperiode van bijna twintig jaar werd gekenmerkt door cruciale jaren van omwenteling en transformatie. Deze biografische bloemlezing biedt inzicht in het veelzijdige leven en baanbrekende leiderschap van Vissering. Van het leiden van s lands financiën tijdens de Eerste Wereldoorlog tot het pionieren met het giroverkeer. Als monetair expert en adviseur van diverse overheden reikte zijn invloed tot ver buiten de landsgrenzen en was Visserings wereldwijde reputatie ongevenaard. Hij ontving zelfs de voor buitenlanders zeldzame rang van mandarijn 2e klasse. In Nederland zelf was hij een drijvende kracht achter het Zuiderzeeproject. Tal van andere maatschappelijke initiatieven konden op zijn inzet rekenen. Het boek bevat originele teksten van Vissering, zowel op financieel-economisch terrein, alsook over de afsluiting en drooglegging van de Zuiderzee en zijn koloniale ervaringen. De bloemlezing wordt uitgebreid ingeleid door politicoloog Meindert Fennema, historicus Roxana Chandali en econoom Heleen Mees. De huidige DNB-president Klaas Knot schreef een voorwoord.
