**Handbook of Leadership Theory and Practice** Nitin Nohria, Rakesh Khurana, 2010-01-26 Scores of books and articles have been written in the popular press and mainstream marketplace about leadership: who leaders are, what they do, and why they matter. Yet in academia, there is a dearth of rigorous research, journal articles, or doctoral programs focused on leadership as a discipline. Why do top business schools espouse mission statements that promise to educate the leaders of the future yet fail to give leadership its intellectual due? The *Handbook of Leadership Theory and Practice* seeks to bridge this disconnect. Based on the Harvard Business School Centennial Colloquium *Leadership: Advancing an Intellectual Discipline* and edited by HBS professors Nitin Nohria and Rakesh Khurana, this volume brings together the most important scholars from fields as diverse as psychology, sociology, economics, and history to take stock of what we know about leadership and to set an agenda for future research. More than a means of getting ahead and gaining power, leadership must be understood as a serious professional and personal responsibility. Featuring the thinking of today's most renowned scholars, the *Handbook of Leadership Theory and Practice* will be a catalyst for elevating leadership to a higher intellectual plane and help shape the research agenda for the next generation of leadership scholars.

*Women and Leadership in Higher Education* Karen A. Longman, Susan R. Madsen, 2014-09-01 *Women and Leadership in Higher Education* is the first volume in a new series of books, *Women and Leadership Research: Theory and Practice*, that will be published in upcoming years to inform leadership scholars and practitioners. This book links theory, research, and practice of women's leadership in various higher education contexts and offers suggestions for future leadership development strategies. This volume focuses on the field of higher education, particularly within the context of the United States, a sector that serves a majority of students at all degree levels who are women yet lacks parity by women in senior leadership roles. The book's fifteen chapters present both hard facts regarding the current demographic realities within higher education and fresh thinking about how progress can and must be made in order for U.S. higher education to benefit from the perspectives of women at the senior leadership table. The book's

opening section provides data and analysis in addressing The State of Women and Leadership in Higher Education the second section offers descriptions of three effective models for women s leadership development at the national and institutional levels the third section draws from recent research to present Women s Experiences and Contributions in Higher Education Leadership The book concludes with five shorter chapters written by current and former college and university presidents who offer Lessons from the Trenches for the benefit of those who follow In short the thesis of the book is that our world is changing higher education collectively as well as institutions of all types must change Bringing more women into leadership is critical to the goal of moving our society and world forward in healthier ways

**Women and Leadership in the European Union** Henriette Müller, Ingeborg Tömmel, 2022-03-03 This volume is the first comprehensive analysis of women s ascendancy to leadership positions in the European Union as well as their performance in such positions It provides a new theoretical and analytical framework capturing both positional and behavioural leadership and the specific hurdles that women encounter on their path to and when exercising leadership The volume encompasses a detailed set of single and comparative case studies analyzing women s representation and performance in the core EU institutions and their individual pathways to and exercise of power in top level functions as well as comparative analyses regarding the position and behaviour of women in relation to men Based on these individual studies the volume draws overarching conclusions about women s leadership in the EU Regarding positional leadership women continue to be underrepresented in leadership positions they more often hold less prestigious portfolios in such positions and manifold structural hurdles hamper their access to power Furthermore huge variations exist across EU institutions with the intergovernmental bodies being the hardest to access Regarding behavioural leadership women acting in powerful EU positions generally perform excellently They successfully exercise a combined leadership style that integrates attributes of leadership considered to be masculine and feminine This is not to argue that women per se are the better leaders Yet more often than men they are exposed to stronger selection processes and their prevalent practice of a combined leadership style tends to best meet the requirements of modern democratic systems and particularly those of the highly fragmented EU
